SCIENCE SCAVENGER HUNT

Hydrogen and oxygen come pouring out.
It drips and it dribbles and it comes from a spout.

We breathe it out and it takes it in.
Your next clue is where is where photosynthesis begins.

When I cut it a gas will irritate my eye.
Sometimes when I'm cooking you might see me cry.

So long ago they used a sundial to tell it.
It starts with a "C" if you want me to spell it.

Early man discovered it and used it with wood.
When I use it on this thing it smells so very good.

It's white and it's healthy but doesn't come from a cow.
If you know what it is, you should have one right now.

A blue whale is louder than any animal around.
Go in search of a thing that also makes a loud sound.

It works because your brain divides things into dots.
That's how you can watch shows that are like a whole lot.

When atoms and molecules start going jumpy
This thing can make steak and potatoes that are lumpy.

Plastikos is the Greek word for the stuff made of crude.
We use it to make dishes and list it as for our food.

Scientists call it sacrose but here it's just what you should take.
It's the sugar in the stuff that makes your cake.
