Rescher, 2012-12-06 The increasingly lively controversy over scientific realism has become one of the principal themes of recent philosophy 1 In watching this controversy unfold in the rather technical way currently in vogue it has seemed to me that it would be useful to view these contemporary disputes against the background of such older epistemological issues as fallibilism scepticism relativism and the traditional realism idealism debate This then is the object of the present book which will reconsider the newer concerns about scientific realism in the context of these older philosophical themes Historically realism concerns itself with the real existence of things that do not meet the eye with suprasensible entities that lie beyond the reach of human perception In medieval times discussions about realism focused upon universals Recognizing that there are physical objects such as cats and triangular objects and red tomatoes the medievals debated whether such abstract objects as cathood and triangularity and redness also exist by way of having a reality independent of the concretely real things that exhibit them Three fundamentally different positions were defended 1 Nominalism Abstracta have no independent existence as such they only exist in and through the objects that exhibit them Only particulars individual substances exist Abstract objects are existents in name only mere thought fictions by whose means we address concrete particular things 2 Realism Abstracta have an independent existence as such Personal Reality, Volume 2 Daniel Paksi, 2019-05-13 Western civilization was built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his/her body We use our billions of years old evolutionary skills and thousands of years old cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our thinking God or matter there is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies The Cosmic Revolutionary's Handbook Luke A. Barnes, Geraint F. Lewis, 2020-02-04 Presents the observations

Lemmo, 2001 A world history textbook chronicling the rise of Western and Eastern civilizations Includes photos art illustrated charts vocabulary exercises and review questions Retrieving Liberalism from Rationalist Constructivism, Volume I Walter B. Weimer, 2022-05-07 This first volume History and its Betrayal traces the development of major themes of liberalism from the increase in human population beyond the limits of the face to face society of tribalism and small groups up until the present day It shows that the principles underlying liberalism are the evolutionary development of social organizations that have resulted from the complexity of human action rather than any conscious design or purpose This book draws out the differences between the classical liberalism dependent upon spontaneous and tacit ordering as a result of evolution and the explicit or conscious or directed version of progressivism It shows that the most important recent developments in the philosophy of rationality and the methodology of scientific research as well as in evolutionary epistemology and the philosophy of biology actually stem from the theories of complex social organization of the moralists such as Hume Ferguson and Smith The book shows clearly that classical liberalism was never refuted indeed no attempt to

do so has been offered it has simply been ignored in favour of programs which sound beneficial and soothing but which cannot be instituted without returning to tribalism
