Scientific Colonialism A Cross Cultural Comparison:

Scientific Colonialism Nathan Reingold, Marc Rothenberg, 1986 **Scientific colonialism** Nathan Reingold, Marc Rothenberg, 1987 Is Science Multicultural? Sandra Harding, 1998-02-22 Explores what the last few decades of European American feminist and postcolonial science and technology studies can learn from each other This book proposes new directions for thinking about objectivity method and reflexivity in light of the new understandings developed in the post World War II world **Relocating Modern Science** K. Raj, 2007-01-05 Relocating Modern Science challenges the belief that modern science was created uniquely in the West and was subsequently diffused elsewhere Through a detailed analysis of key moments in the history of science it demonstrates the crucial roles of circulation and intercultural encounter for their emergence *History of Science in Latin America: The Construction of an Intellectual Field (20th century)* María de la Paz Ramos-Lara, Luis Carlos Arboleda, 2024-12-23 This book provides a unique analysis of how the History of Science became institutionalized in Latin America during the last two decades of the 20th century It examines the establishment of the first Latin American community in the History of Science and its connections with the international community and various international institutions such as the International Union of History and Philosophy of Science and Technology Division of History of Science and Technology IUHPST DHST The authors are the same scholars who have been involved in several activities and strategies to professionalize and institutionalize this field in Latin America They explore the impact of Western educational institutions and theoretical and methodological perspectives on the introduction of the History of Science in several Latin American nations The book examines the two way movement of European scholars to Latin America and Latin American students mainly to France At that time the organization of congresses in France Spain the United States and other European countries encouraged the participation of Latin American historians of science Notable events include the Science and Empires congress in Paris 1990 the Ciencia descubrimiento y mundo colonial conference in Madrid 1991 and the International Congresses of History of Science and Technology ICHST The authors refer to seven Latin Americans who signed the Declaration of Bucharest 1981 to promote the history of sciences in their countries This initiative led to the establishment of the Latin American Society for the History of Science and Technology LASHST in 1982 under the leadership of Juan Jos Salda a director of Quipu and Cuadernos de Quipu With his leadership existing national societies were reactivated and new ones were created up to ten in four years Argentina Brazil Colombia Mexico Chile Peru Venezuela Costa Rica Ecuador and Cuba This effort internationally legitimized Latin American scientific practice culminating in celebrating the XXI ICHST in Mexico City in 2001 He founded the International Association for Scientific Cultural Diversity IASCUD and became the first Latin American to serve as Secretary General of IUHPST DHS from 2001 to 2005 Through his various actions and activities Salda a and the LASHST community were able to promote the institutionalization of the History of Science in Latin America This book pays a well deserved tribute to his efforts **International Science and National Scientific Identity**

R. W. Home, S.G Kohlstedt, 2012-12-06 The institutionalization of History and Philosophy of Science as a distinct field of scholarly endeavour began comparatively early though not always under that name in the Australasian region An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 1960s similar to that which took place in other parts of the world Today there are major Departments at the University of Melbourne the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history philosophy and social studies of science Each volume comprises a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area Papers address general issues however rather than local ones parochial topics are avoided Further more though in each volume a majority of the contributors is from Australia or New Zealand contributions from elsewhere are by no means ruled out Quite the reverse in fact they are actively encouraged wherever appropriate to the balance of the volume in question

Unmasking Ideology in Imperial and Colonial Archaeology Bonnie Effros, Guolong Lai, 2018-12-31 This volume addresses the entanglement between archaeology imperialism colonialism capitalism and war Popular sentiment in the West has tended to embrace the adventure rather than ponder the legacy of archaeological explorers allegations by imperial powers of discovering archaeological sites or saving world heritage from neglect or destruction have often provided the pretext for expanding political influence Consequently citizens have often fallen victim to the imperial war machine seeing their lands confiscated their artifacts looted and the ancient remains in their midst commercialized Spanning the globe with case studies from East Asia Siberia Australia North and South America Europe and Africa sixteen contributions written by archaeologists art historians and historians from four continents offer unusual breadth and depth in the assessment of various claims to patrimonial heritage contextualized by the imperial and colonial ventures of the last two centuries and their postcolonial legacy

Ruling Minds Erik Linstrum, 2016-01-04 The British Empire used intelligence tests laboratory studies and psychoanalysis to measure and manage the minds of subjects in distant cultures Challenging assumptions about the role of scientific knowledge in the exercise of power Erik Linstrum shows that psychology did more to reveal the limits of imperial authority than to strengthen it

Science and Empires P. Petitjean, Cathérine Jami, A.M. Moulin, 2012-12-06 SCIENCE AND EMPIRES FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN Catherine JAMI and Anne Marie MOULIN The International Colloquium Science and Empires Historical Studies about Scientific Development and European Expansion is the product of an International Colloquium Sciences and Empires A Comparative History of Scientific Exchanges European Expansion and Scientific Development in Asian African American and Oceanian Countries Organized by the REHSEIS group Research on Epistemology and History of Exact Sciences and Scientific Institutions of CNRS National

Center for Scientific Research the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago and proposed Sciences and Empires as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group of a gamble Its subject reflected in the title Sciences and Empires is not a currently accepted sub discipline of the history of science rather it refers to a set of questions which found autonomy only recently The terminology was strongly debated by the participants and as is frequently suggested in this book awaits fuller clarification Nationalism and Internationalism in Science, 1880-1939 Elisabeth Crawford, 2002-07-04 This book examines the upsurge of nationalism among scientists of warring nations during and after World War I **Western Science in Modern India** Pratik Chakrabarti, 2004 The Book Is About Western Science In A Olonial World It Asks How Do We Understand The Transfer And Absorption Of Scientific Knowledge Across Diverse Cultures From One Society To Another This Monograph Will Interest Scientists Historians And Sociologists As Well As Students Of Imperialism And The History Of Ideas **Signs of Science** Dale J. Pratt, 2001 Signs of Science Literature Science and Spanish Modernity since 1868 traces how Spanish culture represented scientific activity from the mid nineteenth century onward The book combines the global perspective afforded by historical narrative with detailed rhetorical analyses of images of science in specific literary and scientific texts As literary criticism it seeks to illuminate similarities and differences in how science and scientists are pictured as cultural history it follows the course of a centuries long dialogue about Spain and science **Green Imperialism** Richard H. Grove, 1996-03-29 The first book to document the origins and early history of environmentalism especially its colonial and global aspects **Sickness and the State** Lenore Manderson, 1996 This 1996 book is a history of health and disease in Malaya from colonisation to World War II **Theorising the Ibero-American Atlantic** , 2013-10-02 Theorising the Ibero American Atlantic offers a fresh look at the Atlantic turn in Ibero American Studies Taking the criticisms launched at Atlantic Studies as a starting point contributors query and explore the viability of the Ibero American Atlantic as a framework of research Their essays take stock of theories methodologies debates and trends in recent scholarship and set down pathways for future research As a result the contributions in this volume establish the historical reality of the Ibero American Atlantic as well as its tremendous value for scholarship Contributors are Vanda Anast cio Francisco Bethencourt Harald E Braun David Brookshaw Jorge Ca izares Esguerra Daniela Flesler Andrew Ginger Eliga Gould David Graizbord Thomas Harrington Luis Mart n Cabrera Jos C Moya Mauricio Nieto Olarte Joan Ramon Resina N Michelle Shepherd Lisa Vollendorf and Grady C Wray **Raja Serfoji II** Savithri Preetha Nair, 2014-03-14 In the early nineteenth century the south Indian kingdom of Tanjore which had come under the control of the East India Company flourished as a centre of enlightenment This book traces the contours of the Tanjore enlightenment which produced a knowledge that was at once modern and deeply rooted in the indigenous tradition The chief protagonist of this first ever full length study on Tanjore at the turn of the nineteenth

century is Raja Serfoji II r 1798 1832 in whose world science and God coexisted comfortably Tanjore at this time was a thriving contact zone linked to several centres through extensive local and global networks Its court attracted a great number of visitors including Christian missionaries high ranking Company officials princely contemporaries naturalists and medical practitioners Dwelling on the locatedness of science and enlightenment modernity in the context of the colonial periphery the book describes how the Raja deployed certain vectors of assemblage an array of practices instruments theories and people including his vast collection of manuscripts books and scientific instruments a Devanagari printing press a menagerie health establishments and a large retinue of trained experts and artists to invent Tanjore as a contemporary centre Shunning reductionist and diffusionist explanations of the transmission of Western science in colonial settings the study uses hitherto unexplored archival sources to reconstruct the Tanjore enlightenment as the outcome of globally situated cross cultural exchanges It celebrates the openness and confidence with which European science was engaged with assimilated translated and reinvented in a contact zone located in the colonial backwaters of south India The book will be of interest to historians sociologists and those interested in history of science and medicine anthropologists cultural studies scholars as well as the general reader Geo-epistemology Claudio Canaparo,2009 This book is about the formation and development of Latin America as name idea and concept as well as the wider concepts of location knowledge and the relationship between them Latin America is not only a subject or an academic construct it is also a perspective from which subjectivities are established knowledge is developed and narratives are produced This study argues that epistemology cannot exist in abstract terms despite traditional academic arguments to the contrary Therefore the author uses Latin America to anchor his more general arguments in a particular location and calls this approach geo epistemology The author discusses how the specificity of a particular location can contribute to the establishment of both a method of formulating human knowledge and the boundaries of what can be known The text explores the relationship between philosophy geography and geometry and analyses the notions of science empire and colonialism In response to the contemporary debate on space of thinking the author proposes a new concept of reversal thinking which leads to an examination of the roles of language and writing from an epistemic point of view The Andean Wonder Drug Matthew James Crawford,2016-09-07 In the eighteenth century malaria was a prevalent and deadly disease and the only effective treatment was found in the Andean forests of Spanish America a medicinal bark harvested from cinchona trees that would later give rise to the antimalarial drug quinine In 1751 the Spanish Crown asserted control over the production and distribution of this medicament by establishing a royal reserve of fever trees in Quito Through this pilot project the Crown pursued a new vision of imperialism informed by science and invigorated through commerce But ultimately this project failed much like the broader imperial reforms that it represented Drawing on extensive archival research Matthew Crawford explains why showing how indigenous healers laborers merchants colonial officials and creole elites contested European science and thwarted imperial reform by asserting

their authority to speak for the natural world The Andean Wonder Drug uses the story of cinchona bark to demonstrate how the imperial politics of knowledge in the Spanish Atlantic ultimately undermined efforts to transform European science into a tool of empire **Companion to the History of Modern Science** G N Cantor,G.N. Cantor,J.R.R. Christie,M.J.S.

Hodge,R.C. Olby,2006-09-07 A descriptive and analytical guide to the development of Western science from AD 1500 and to the diversity and course of that development first in Europe and later across the world Presented in clear non technical language Extensive indexes of Subjects and Names Indeed a companion volume whose 67 essays give pleasure and instruction an ambitious and successful work Times Literary Supplement This work is an essential resource for libraries everywhere For specialist science libraries willing to keep just one encyclopaedic guide to history for undergraduate libraries seeking to provide easily accessible information for the devisers of university curricula for the modern social historian or even the eclectic scientist taking a break from simply making history this is the book for you Times Higher Education Supplement A pleasure to read with a carefully chosen typeface well organized pages and ample margins it is very easy to find one s way around This is a book which will be consulted widely Technovation This is a commendably easy book to use British Journal of the History of Science Scholars from other areas entering this field students taking the vertical approach and teachers coming from any direction cannot fail to find this an invaluable text History of Science Journal **Global**

Epistemologies and Philosophies of Science David Ludwig,Inkeri Koskinen,Zinhle Mncube,Luana Poliseli,Luis Reyes-Galindo,2021-07-29 In bringing together a global community of philosophers Global Epistemologies and Philosophies of Science develops novel perspectives on epistemology and philosophy of science by demonstrating how frameworks from academic philosophy e g standpoint theory social epistemology feminist philosophy of science and related fields e g decolonial studies transdisciplinarity global history of science can contribute to critical engagement with global dimensions of knowledge and science Global challenges such as climate change food production and infectious diseases raise complex questions about scientific knowledge production and its interactions with local knowledge systems and social realities As academic philosophy provides relatively little reflection on global negotiations of knowledge many pressing scientific and societal issues remain disconnected from core debates in epistemology and philosophy of science This book is an invitation to broaden agendas of academic philosophy by presenting epistemology and philosophy of science as globally engaged fields that address heterogeneous forms of knowledge production and their interactions with local livelihoods practices and worldviews This integrative ambition makes the book equally relevant for philosophers and interdisciplinary scholars who are concerned with methodological and political challenges at the intersection of science and society
