Produce consistent, high-quality film, with a Dolev[®] 800V² or Dolev 800V large-format imagesetter. Featuring high-quality imaging and fully automatic loading and unloading, these imagesetters are designed for production environments where performance and flexibility are essential. Compatible with most popular workflows, Dolev 800 imagesetters are ideally driven by powerful Creo workflow software that offers fast, automatic RIPing, trapping and automatic picture replacement.

Turbo Screening, variable resolution and CTP capability deliver quality and flexibility

On both Dolev 800V² and 800V models, Turbo Screening[™] technology is the basis for superb, repeatable screen quality. Turbo Screening technology accelerates data handling and produces consistent, high-quality imaging, with enhanced gray levels, for superb screen quality and excellent vignettes.

Dolev 800V² and 800V imagesetters feature continuously-variable resolution, to match any job, from fine art reproduction, to packaging or newspaper printing. For added flexibility, they can alternately expose film or polyester plates, allowing you to expand into short run computer-to-plate (CTP) production.

Cassette and custom punching options for fast production with precise registration

Choose the cassette loading option that best suits your production needs. The 3-cassette loader offers the versatility of three different film widths, while the 2-cassette loader is for high-volume production, permitting long periods of unattended production.

The optional customized bead punch prepares pre-punched, plate-ready film, eliminating registration problems and making stripping, external punching or cross-punching unnecessary.
