

2024 ECONOMICS 12 MACROECONOMICS ESSAYS (P1)

A. CIRCULAR FLOW

1. Discuss in detail the markets within the FOUR-SECTOR model. (28 marks)

INTRODUCTION

- ✓ **Market** is the mechanism that brings buyers and sellers together to exchange goods and services. ✓✓
- ✓ Markets coordinate economic activities and determine prices of goods and services. ✓✓

BODY

PRODUCT AND FACTOR MARKETS

Product market/Goods/Output markets ✓

- Product market is where goods and services are exchanged for money. ✓✓
- E.g. Shoprite retailer. ✓
- These are markets for consumer goods and services. ✓✓
- **In economics a distinction is made between goods and services:**
- Goods are defined as any tangible items such as clothing, food cars that satisfy human wants or need. ✓✓
- Capital and consumer goods are traded in these markets. ✓✓
- Capital goods market are trading buildings and machinery. ✓✓
- Consumer goods markets are trading durable consumer goods, semi-durable goods and non-durable goods. ✓✓
- Services are defined as non-tangible actions e.g. wholesalers and retailer, transport and financial markets. ✓✓

Factor market/Resource/Input markets ✓

- Factor market is where factors of production are traded. ✓✓ e.g. labour is hired and capital is borrowed. ✓✓
- Households sell factors of production in this market. ✓✓
- These services earn wages for labour, interest for capital, rent for natural resources and profits for entrepreneurship. ✓✓
- Labour can be bought and sold in this market. ✓✓
- Factor market includes labour, property and financial markets. ✓✓
 - ✓ Product markets and factor markets are related in the sense that the demand for factor services is a derived demand. ✓✓

The Economics of Protected Marine Species: Concepts in Research and Management Kristy Wallmo,Kathryn Bisack,Daniel K. Lew,Dale E. Squires,2016-10-21 Protected marine species have populations that are depleted decreasing or are at risk of extinction or local extirpation As of 2015 The International Union for the Conservation of Nature a global environmental organization lists approximately 737 marine

species worldwide that are considered at risk of extinction Many are provided legal protection through national laws requiring research and management measures aimed at recovering and maintaining the species at a sustainable population level Integral to the policy decision process involving the management and recovery of marine species is the consideration of trade offs between the economic and ecological costs and benefits of protection This suggests that economics at its core the study of trade offs has a significant role In the U S a somewhat traditional use of economics in protected species research and management has involved cost minimization or cost effectiveness analyses to help select or prioritize conservation actions Economic research has also provided estimates of public non market benefits of recovering species which can be used in larger management frameworks such as ecosystem based management and coastal and marine spatial planning Inherent in much of this research however are complex biological and ecological relationships in which varying degrees of scientific uncertainty are present Addressing this type of uncertainty can affect the economic outcomes related to protected species For example recent work suggests that increasing scientific precision in biological sampling and models can greatly affect the magnitude of economic benefits to commercial fisheries while other research suggests that public non market benefits of species recovery are sensitive to uncertainty about baseline population estimates Previous research has illustrated the importance of understanding the biological ecological and economic aspects of protected species management and recovery In this research topic we synthesize current protected marine species economic research and expand the discussion on present and future challenges related to protected species economics The series of manuscripts brings together an array of prominent researchers and advances our understanding of the ecological and economic aspects of managing and recovering protected marine species

Law and Economics of Personalized Medicine Karin Bosshard, 2018-05-14 The book adds to the discussion about strategic approaches towards the translation of personalized medicine into clinical practice It stresses the importance of non science related institutional barriers A Law and Economics perspective is applied in order to examine the incentives induced by the barriers An applied part identifies and evaluates policy levers to foster the translation of personalized medicine into Swiss clinical practice

School's Choice Wagma Mommandi, Kevin Welner, 2021 Access issues are pivotal to almost all charter school tensions and debates How well are these schools performing Are they segregating and stratifying Are they public and democratic Are they fairly funded Can apparent successes be scaled up Answers to all these core questions hinge on how access to charter schools is shaped This book describes the incentives and pressures on charter schools to restrict access and examines how charters navigate those pressures explaining access restricting practices in relation to the ecosystem within which charter schools are created It also explains how charters have sometimes responded by resisting the pressures and sometimes by surrendering to them The text presents analyses of 13 different types of practices around access each of which shapes the school's enrollment The authors conclude by offering recommendations for how states and authorizers can address access related inequities that arise in the charter sector School

s Choice provides timely information on critical academic and policy issues that will come into play as charter school policy continues to evolve Book Features Examines how charter schools control who gains and retains access Explores policies and practices that undermine equitable admission and encourage opportunity hoarding Offers a set of policy recommendations at the state and federal level to address access related issues *African American Women with Incarcerated Mates* Avon Hart-Johnson,2017-11-20 After four decades of mass incarceration in the U S the disproportionate number of black men in prisons has contributed to an epidemic of black women struggling to support fragile families Yet the literature is scant on how African American women are affected by the imprisonment of their partners Drawing on case studies and firsthand accounts the author brings needed perspective to the political economic and psychological challenges they face including the experience of symbolic imprisonment or serving time on the outside *How Social Science Got Better* Matt Grossmann,2021-08-06 In *How Social Science Got Better* Matt Grossmann provides a robust defense of the current state of the social sciences He focuses in particular on the salutary innovations in research methods and the broadening of subject matter that academics deem worthy of inquiry He offers a wide ranging account of current research trends that will necessarily force the academy s many critics to rethink their lazy critiques and instead acknowledge the path breaking advances in knowledge occurring in the social sciences today **Fibre2Fashion - Textile Magazine - April 2016** Fibre2Fashion,2016-04-01 Fibre2Fashion magazine the print venture of Fibre2Fashion com since 2011 is circulated among a carefully chosen target audience globally and reaches the desks of top management and decision makers in the textiles apparel and fashion industry As one of India s leading industry magazines for the entire textile value chain Fibre2Fashion Magazine takes the reader beyond the mundane headlines and analyses issues in depth Debating Modern Medical Technologies Karen J. Maschke,Michael K. Gusmano,2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors Medical technologies often promise to extend and improve quality of life but come with many questions Are they safe and effective Are they worth the cost When should they be allowed on the market and when should Medicare Medicaid and private insurance companies be required to pay for drugs devices and diagnostic tests Using case studies of disputes about the value of mammography screening genetic testing for disease risk brain imaging technologies to detect biomarkers associated with Alzheimer s disease cell based therapies and new expensive drugs Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies physicians and patient advocates *Debating Modern Medical Technologies The Politics of Safety Effectiveness and Patient Access* reveals stakeholders differing values and interests regarding patient choice physician autonomy risk assessment government intervention in medicine and technology assessment and scientific innovation as a driver of national

and global economies It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients
