Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind  
to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students  
must chart through community college The book follows 1 670 two year college students over four years as they begin STEM  
programs in the Midwest and documents their educational and life experiences as they moved toward or away from the  
prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to  
transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories  
linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and  
financial resources their experiences with teaching and advising and the conundrum between support from and for family  
among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the  
current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli  
Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible  
welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs  
of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as  
an equitable pathway to bachelor s degrees and beyond      **Index de Recherche Du Canada, Microlog** ,1979 An index and
