Designing Engineering and Technology Curricula John Heywood, 2022-06-01 The intention of this book is to demonstrate that curriculum design is a profoundly philosophical exercise that stems from perceptions of the mission of higher education Since the curriculum is the formal mechanism through which intended aims are achieved philosophy has a profound role to play in the determination of aims It is argued that the curriculum is far more than a list of subjects and syllabi or that it is the addition and subtraction of items from a syllabus or whether this subject should be added and that subject taken away This book explores how curricular aims and objectives are developed by re examining the

curriculum of higher education and how it is structured in the light of its increasing costs rapidly changing technology and the utilitarian philosophy that currently governs the direction of higher education It is concluded that higher education should be a preparation for and continuing support for life and work a consequence of which is that it has to equip graduates with skill in independent learning and its planning and reflective practice A transdisciplinary curriculum with technology at its core is deduced that serves the four realities of the person the job technology and society
