### C Characterisation & Setting — Crooks and his Room

This chapter is set in the harness room, 'a little shed that leaned off the wall of the barn', home to Crooks, 'the negro stable buck'. There is a detailed description of his room and its contents. Living in seclusion in a small, isolated room, Crooks lives a bitter and lonely life in the barn, which is a disheartening and foreboding place in the story.

1 Write a contents list for Crooks's room and say what each item tells us about him.

Items	What it tells us about Crooks
Long box filled with straw, on which his blankets were flung	Crooks is poor and has no money to buy proper bedding. He is not allowed to sleep in the main barn, so he has to sleep in the white work-shed. The straw box is the only thing he has in the harness room, which is a dark and lonely place for him.
Pegs on which hung broken harness in place of being mended	Crooks is a stable buck, and his job is to mend harness. The fact that the harness is broken and not mended suggests that he is not valued and his work is not appreciated.
A little bench for leather-working	Crooks is a skilled leather worker, and the bench is a sign of his profession.

2 Using the passage from Chapter 4 below, draw a realistic, accurate picture of Crooks's room. Why do you think Steinbeck has included a character like Crooks in the novel?

"Crooks had his apple box on his back, and in it a range of medicine bottles, both for himself and for the mares. There were cans of saddle soap and a dippy can of tar with its paint brush sticking over the side. And scattered about the floor were a number of personal possessions, for, being alone, Crooks carried his things about, and being a stable buck and a cripple, he was more possessive than the other men, and he had accumulated more possessions than he could carry on his back.

Crooks possessed several pairs of shoes, a pair of rubber boots, a big alarm clock and a single-bottled shotgun. And he had books, too; a tattered dictionary and a mangled copy of the California civil code for 1905. There were tattered magazines and a few dirty books on a special shelf over his back. A pair of large gold-rimmed spectacles hung from a nail on the wall above his head. This room was meagre and badly kept, for Crooks was a proud, self-man.

Anson,Lee-Ann Kastman Breuch,Thomas Reynolds,2014-10-16 Given the increased use of digital reading and writing tools in the classroom this book provides secondary and college English language arts teachers with activities and classroom examples for using a range of different digital tools blogs wikis websites annotations Twitter mapping forum discussions etc to engage students in understanding and creating digital texts It therefore integrates reading and writing instruction through goal driven activities supported by uses and affordances of digital tools This book also provides a framework for designing these activities that encourage students to define purpose and audience make connections between digital texts and people collaborate with others employ alternative modes of communication and gain new perspectives and constructing identities practices that are linked to addressing the high school English Language Arts Common Core State Standards The book also describes ways to use digital tools to support these practices for example using digital tools to foster students collaborative reading and writing The book also describes use of digital feedback and e portfolio tools to foster students reflection on their uses of these practices      *A Theory of Distributed Number* Myriam Dali,Eric Mathieu,2021-08-15 The objective of this book is to develop a deeper understanding of the form and interpretation of number Using insights from Generative syntax and Distributed Morphology we develop a theory of distributed number arguing that number can be associated with several functional heads and that these projections exist depending on the features they specify In doing so we make a strong claim for a close mapping between the syntactic structure and the semantics in the noun phrase since each node corresponds to a different interpretation of number Despite some technical implementations the book is accessible to linguists working outside any particular syntax semantic framework since we propose generalizations that are applicable in many if not all models of grammar The book focuses on Arabic but also discusses a number of languages including English French Ojibwe Blackfoot Hebrew Japanese Korean Chinese Turkish Persian and Western Armenian      *Ourselves* Frank Smith,2013-05-13 This book delves into how we come to terms with ourselves with other people and with the world in general It is about how we come to be what we are and to think the way we do It is a book about influences on this process A particular influence to which Smith gives central consideration is language not just in terms of the communicative networks in which it engages us the information that presents itself to us but in the largely unsuspected framework for thought that lies within language itself He also considers deeply the role of technology This is a book of description not of explanations these are two quite different intellectual territories Smith writes about what can be observed not philosophized about Thus he does not discuss the inner workings of the human brain His claim is that what he is interested in thinking learning understanding remembering have never been found in the brain The aim is to describe the scope and limits for how we can be seen to think learn understand and remember but not to explain such behavior by recourse to hypothetical inner entities *Ourselves* speaks especially to

educators It outlines the possibilities and limitations inherent in all of us It delineates who we are but also stresses that no two people are the same that what we become depends on our journeys in life and the people we encounter on the way The formal part of learning that is called education is particularly sensitive to the role of people who organize critical experiences for us our teachers The brief summaries at the end of each chapter reinforce and highlight points that are of particular relevance to teachers Researchers professionals and graduate students across the fields of literacy education psychology of reading learning theory human learning educational psychology and psycholinguistics will find this book compelling
