Gender and Climate Change Joane Nagel,2015-09-25 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the sometimes surprising differential gendered impacts of climate changes

Cross-Border Management Rongxing Guo,2015-01-05 This book presents a new approach to management in an increasingly interactive world In this context the use of the word new has two meanings The first relates to a new definition of borders which are natural institutional functional or mixed the second concerns the fact that the book applies and where necessary develops analytical tools methods and models that are different from those used in other similar books The objectives of this book are to clarify whether existing management theories and methods can be effectively applied in an entity which can be defined as a sovereign country a region a community a culture or a firm as the latter increasingly interacts with the rest of the world to develop qualitative and quantitative methods to help leaders make optimal decisions for their entity and at the same time to maximize the positive or minimize the negative effects of those decisions on the rest of the world and to design workable cross border cooperation plans and conflict management schemes that allow policy makers to better cope with the challenges and problems posed by our increasingly interactive world

Science Policies and Twentieth-Century Dictatorships Amparo Gómez, Antonio Fco. Canales, Brian Balmer,2016-03-03 Making a fresh contribution to the political history of science this book explores the connections between the science policies of three countries that each experienced considerable political upheaval in the twentieth century Spain Italy and Argentina By focussing on these three countries the contributors are able to present case studies that highlight the characteristics and specificities of the democratic and dictatorial political processes involved in the production of science and technology The focus on dictatorship presents the opportunity to expand our knowledge beyond the more extensive literature about science in Nazi Germany and Stalinist USSR about the level of political involvement of scientists in non democratic contexts and to what extent they act as politicians in different contexts Key topics covered include the new forms of organization and institutionalization of science in the twentieth century the involvement of scientific communities in the governance of science and its institutions the role of ideology in scientific development the scientific practices adopted by

scientific communities in different contexts and the characteristics of science and technology produced in these contexts

Sustainably Sara J. Wilkinson, Sarah L. Sayce, Pernille H. Christensen, 2015-06-05 *Developing Property Sustainably* introduces readers to the key issues surrounding sustainable property development in the global marketplace. Pulling together received wisdom and original research, the authors provide a clear and practical overview of the sustainable property development process as well as a critical appraisal of the problems faced by global built environment stakeholders. Throughout, the authors demonstrate how the property development industry could and should respond better to debate on sustainable practices in the built environment by adopting more rigorous measurement techniques and sustainable approaches. Starting by exploring key definitions and stakeholders, the book goes on to explore finance, planning, construction, procurement, occupation, retrofit and lifecycle sustainability in order to provide the reader with a detailed understanding of all the issues involved in the delivery of sustainable property development from inception to occupation and beyond. Throughout the book, international case studies are used to demonstrate how sustainable property development is applied in practice around the world. With a logical chapter structure and accessible writing style, *Developing Property Sustainably* would be perfect for use on undergraduate and postgraduate modules and courses in real estate development, property and urban development and other built environment programmes. *Heteromation, and Other Stories of Computing and Capitalism*

Hamid R. Ekbja, Bonnie A. Nardi, 2017-05-04 An exploration of a new division of labor between machines and humans in which people provide value to the economy with little or no compensation. The computerization of the economy and everyday life has transformed the division of labor between humans and machines, shifting many people into work that is hidden, poorly compensated or accepted as part of being a user of digital technology. Through our clicks and swipes, logins and profiles, emails and posts, we are more or less willingly participating in digital activities that yield economic value to others but little or no return to us. Hamid Ekbja and Bonnie Nardi call this kind of participation the extraction of economic value from low cost or free labor in computer mediated networks: heteromation. In this book, they explore the social and technological processes through which economic value is extracted from digitally mediated work, the nature of the value created and what prompts people to participate in the process. Arguing that heteromation is a new logic of capital accumulation, Ekbja and Nardi consider different kinds of heteromated labor: communicative labor seen in user generated content on social media; cognitive labor including microwork and self service; creative labor from gaming environments to literary productions; emotional labor often hidden within paid jobs; and organizing labor made up of collaborative groups such

as citizen scientists Ekbia and Nardi then offer a utopian vision heteromation refigured to bring end users more fully into the prosperity of capitalism
