Asabere-Ameyaw, Jophus Anamuah-Mensah, George Sefa Dei, Kolawole Raheem, 2014-07-11 There is no term so heavily contested in social science literature nomenclature than Development This book brings Indigenous perspectives to African development It is argued that contrary to development as we know it not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since everything we do about our world is development So how come there is difficult knowledge when it comes to learning from what we know i.e. what local peoples do and have done for centuries as a starting point to reconstructing and reframing development In getting our heads around this paradox we are tempted to ask more questions How do we as African scholars and researchers begin to develop home grown solutions to our problems How do we pioneer new analytical

systems for understanding our communities and offer a pathway to genuine African development i e Indigenist African development see also Yankah 2004 How do we speak of Indigenist development mindful of global developments and entanglements around us Can we afford to pursue development still mired in a catch up scenario Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line A Publication of the Centre for School and Community Science and Technology Studies SACOST University of Education Winneba Ghana

Aikhenvald, R. M. W. Dixon, 2014-02-28 The Grammar of Knowledge offers both a linguistic and anthropological perspective on the expression of information sources as well as inferences assumptions probability and possibility and gradations of doubt and beliefs in a range of languages The book investigates twelve different languages from families including Tibeto Burman Nakh Dagestani and Austronesian all of which share the property of requiring the source of information to be specified in every sentence In these languages it may not be possible to say merely that the man went fishing Instead the source of evidence for the statement must also be specified usually through the use of evidential markers For example it may be necessary to indicate whether the speaker saw the man go fishing has simply assumed that the man went fishing or was told that he went fishing by a third party Some languages such as Hinuq and Tatar distinguish between first hand and non first hand information sources others such as Ersu mark three distinct types of information directly required inferred or assumed and reported Some require an even greater level of specification Ash ninka Peren from South America has a specific marker to express suspicions or misgivings Like others in the series the book illustrates and examines these aspects of language in different cultural and linguistic settings It will interest linguists of all persuasions as well as linguistically minded anthropologists
