My cat, Paul, can't really talk, but she talks like a lion.
She does so in her own way. Paul certainly knows how to

communicate her feelings. I just have to pay

attention as what she does.

Like all cats, Paul says "meow." One kind of meow
is usually greeting. It means, "Hi! I'm
glad to see you."

Many loud meows are offensive.

"Look at me! Something's wrong! I need help!"

Paul's purr usually like a motor. It tells me my

The Great Wall of China

Put in the blanks in each
sentence the best word
one of the words appearing
in the word bank.

What's the biggest wall you've ever seen? It's 20,000
miles long! China is home again to many
places from around the world. There's only one wall
that big. It's the Great Wall of China.

Two thousand years ago, China had many
armies. The emperor thought a strong
wall would keep China safe. He had
people build old walls. He had them build new walls out of stone
and wood. There were conquest over all, making
one 5,000-mile long wall that the men 1,000 years, other emperors
extended the wall. Finally, it stretched for 6,300 miles.
Some of it has crumbled. But much of it still stands and
it is a symbol of national pride.

G. Aaron, 1989-03-31 Even though I had been studying reading problems in children for a number of years as a means of understanding cognitive processes I became deeply committed to the study of developmental dyslexia after my encounter with S H a dyslexic college student Until then dyslexia to me remained an interesting phenomenon but somewhat removed from the mainstream of my research interests The facts that in spite of his superior IQ S H could read no better than a child in the fifth grade and misspelled even common words such as was and here however took me by surprise and made me appreciate the intriguing and challenging nature of developmental dyslexia This led to a series of studies of college students with reading disability a group that is relatively unexplored The general plan of these investigations was to study a small number of disabled readers at any given time rather intensively Even though this approach limits the generalizability of the research findings it lays bare some of the most interesting facts about dyslexia which are obscured in large scale statistical studies These studies have now extended well over a decade and are still continuing As soon as these studies were started it became obvious that not all reading disabled college students are alike and that disabled readers could be classified into three broad categories those with poor decoding skill those with poor comprehension ability and those with a combination of these two deficits Studies in Education Indiana University.
