Planting schemes are undertaken on the basis of a binding contract, generally between the client who owns or leases the landscape and the implementer, the landscape contractor, with the

designer acting both as specifier and contract administrator Within this contractual relationship planting schemes must be implemented to an agreed timetable To manage this procedure efficiently landscape designers and managers need quick access to the factual and scientific background for practical planting design and its implementation through specification writing and contracts The book covers over 20 well defined topics and is written by leading experts in the industry It is arranged into five sections Preliminaries to plant use and the landscape Managing plant growth on landscape sites Establishment and management of trees Establishment and management of smaller woody plants Establishment and management of herbaceous plants Carefully illustrated with diagrams black and white photographs and colour plates this handbook provides a unique resource for professionals wanting to improve their specification skills as well as to explore creative approaches to design and practical implementation
