Doing Environmental Ethics Robert Traer, 2009-02-10 Doing Environmental Ethics is a brief accessible applied ethics book offering an inclusive and practical way for an individual to personally address the world's ecological crisis. Author Robert Traer builds on a commonsense understanding of doing what is right and being a good person and suggests how with a deeper sense of self and one's place in nature we can begin to change our carbon footprint. To consider and understand public policies and personal environmental practices Traer draws on secular and religious perspectives as well as Eastern and Western traditions. Doing Environmental Ethics devotes central attention to considerations of duty to other people, species and ecosystems, character, personal traits and virtues, relationships to people and the natural environment, and rights of people to participate in land use decisions that affect them. Discussion questions at the end of each chapter help readers clarify their reasoning and create action plans for change. Doing Environmental Ethics demonstrates how valuable defining one's own philosophy about the environment is to living with greater ecological awareness and sense of personal responsibility. Jacket

Achieving the Sustainable Development Goals Simon Dalby, Susan Horton, Rianne Mahon, Diana Thomaz, 2019-04-11 This book draws on the expertise of faculty and colleagues at the Balsillie School of International Affairs to both locate the Sustainable Development Goals (SDGs) as a contribution to the development of global government and to examine the political, institutional and financial challenges posed by the SDGs. The contributors are experts in global governance issues in a broad variety of fields ranging from health, food systems, social policy, migration and climate change. An introductory chapter sets out the broad context of the governance challenges involved and how individual chapters contribute to the analysis. The book begins by focusing on individual SDGs, examining briefly the background to the particular goal and evaluating the opportunities and challenges, particularly governance challenges, in achieving the goal as well as discussing how this goal relates to other SDGs. The book goes on to address the broader issues of achieving the set of goals overall, examining the novel financing mechanisms required for an enterprise of this nature, the trade-offs involved, particularly between the urgent climate agenda and the social/economic goals, the institutional arrangements designed to enable the achievement of the goals, and offering a critical perspective on the enterprise as a whole. Achieving the Sustainable Development Goals makes a distinctive contribution by covering a broad range of individual goals with contributions from experts on governance in the global climate, social and economic areas, as well as providing assessments of the overall project, its financial feasibility, institutional requisites, and its failures to tackle certain problems at the core. This book will be of great interest to scholars and students of international affairs, development studies and sustainable development, as well as those engaged in policymaking nationally, internationally and those working in NGOs.

Sustainable Agriculture Reviews Eric Lichtfouse, 2012-12-04 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. It is a discipline that addresses current

issues climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion This series gathers review articles that analyze current agricultural issues and knowledge then proposes alternative solutions **Agroecology** V. Ernesto Méndez, Christopher M. Bacon, Roseann Cohen, Stephen R. Gliessman, 2015-11-18 Agroecology A Transdisciplinary Participatory and Action oriented Approach is the first book to focus on agroecology as a transdisciplinary participatory and action oriented process Using a combined theoretical and practical approach this collection of work from pioneers in the subject along with the latest generation of acknowledged leaders Introduction to Cultural Ecology Mark Q. Sutton, E. N. Anderson, 2013-12-12 All peoples and cultures face environmental issues but as this accessible text shows how they respond to such issues varies widely around the world and across human history Introduction to Cultural Ecology Third Edition familiarizes students with the foundations of the field and provides a framework for exploring what other cultures can teach us about human environment relationships Drawing on both biological and cultural approaches the authors first cover basic principles of cultural anthropology environmental studies and human biological adaptations to the environment They then consider environmental concerns within the context of diverse means of making a living from hunting and gathering to modern industrial societies detailed case studies add depth and breadth to the discussion **Religion Around Bono** Chad E. Seales, 2019-10-24 For many U2 s Bono is an icon of both evangelical spirituality and secular moral activism In this book Chad E Seales examines the religious and spiritual culture that has built up around the rock star over the course of his career and considers how Bono engages with that religion in his music and in his activism Looking at Bono and his work within a wider critique of white American evangelicalism Seales traces Bono s career from his background in religious groups in the 1970s to his rise to stardom in the 1980s and his relationship with political and economic figures such as Jeffrey Sachs Bill Clinton and Jesse Helms In doing so Seales shows us a different Bono one who uses the spiritual meaning of church tradition to advocate for the promise that free markets and for profits will bring justice and freedom to the world s poor Engaging with scholarship in popular culture music religious studies race and economic development Seales makes the compelling case that neoliberal capitalism is a religion and that Bono is its best known celebrity revivalist Engagingly written and bitingly critical Religion Around Bono promises to transform our understanding of the rock star s career and advocacy Those interested in the intersection of rock music religion and activism will find Seales s study provocative and enlightening Universities and the Sustainable Development Future Peter H. Current Status and Trends in Urban Agriculture Thomas Henry Whitlow,Yoshiki Harada,Zhongqi Cheng,Gaston Small,2022-03-31 *Veterinary and Human Toxicology* ,1977 **Evolution in the Here and Now** Nigel Barber,2020-05-12 This book argues that the two most influential theories on modern human behavior cultural determinism

and evolutionary psychology are quite inadequate Cultural deterministic theories deny personal experience and too often fall prey to anthropocentric bias Most evolutionary psychologists argue that humans are shaped to fit our ancestral past effectively freezing us in time Evolution in the Here and Now looks to new factors like social learning and adaptation to explain the idiosyncrasies of human behavior in a more complete and nuanced way Evolutionary psychologist Nigel Barber shows that human behavior is uniquely crafted by the surrounding environment in underappreciated and surprising ways For example commerce and agriculture can be interpreted as adaptive alternatives to hunting and gathering Irrigated farming was a response to land scarcity which ultimately permitted the rise of early cities This cross disciplinary approach unites the missing ingredients that have for so long impeded our understanding of our own species and its variation across cultures Evolution in the Here and Now is a bold step forward in the evolutionary understanding of human behavior that marries our biology with our history in ways that have never been attempted before

Dietary Supplements for the Health and Quality of Cultured Fish Heisuke Nakagawa, Minoru Sato, Delbert M. Gatlin, 2007-01-01 Proper nutrition and feeding are critical components of aquaculture Effective utilization of well balanced diet formulations is of utmost importance and influences most aspects of production including the cost yield and quality of resulting products as well as the sustainability of aquacultural practices including potential environmental impacts In addition to the various required macro and micro nutrients emphasis has been placed on non nutritive supplements in recent years These have been found to influence many attributes of freshwater and marine fish particularly taste and colour resistance to disease and health benefits to human consumers This book presents a comprehensive review of the most important nutrients and non nutritive supplements using scientific evidence to support the best practices for using these compounds in diet formulations to enhance the efficiency and sustainability of aquaculture This book is a valuable resource for students and practitioners in aquaculture and fisheries as well as animal nutrition feeding and husbandry
