Genetics of Acquired Antimicrobial Resistance in Animal and Zoonotic Pathogens Axel Cloeckaert, Michel Stanislas Zygmunt, Benoît Doublet, 2018-01-26 Development and spread of antimicrobial resistance is the result of an evolutionary process by which microorganisms adapt to antibiotics through several mechanisms including alteration of drug target by mutation and horizontal transfer of resistance genes The concomitant occurrence of independent antimicrobial resistance mechanisms is a serious threat to human health and has appeared in several emerging epidemic clones over the past decade in humans and also in animals The increasing prevalence of antimicrobial drug resistance among animal and zoonotic foodborne pathogens is of particular concern for public health In this Ebook we gathered a collection of

articles which deal with the most important aspects of the genetics of acquired antimicrobial resistance extending from medically important resistance emerging epidemic resistant clones main mobile genetic elements spreading resistance resistomes dissemination between animals and humans to the One Health concept

Mindful Journalism and News Ethics in the Digital Era Shelton A. Gunaratne, Mark Pearson, Sugath Senarath, 2015-02-11 This book aims to be the first comprehensive exposition of mindful journalism drawn from core Buddhist ethical principles as a fresh approach to journalism ethics It suggests that Buddhist mindfulness strategies can be applied purposively in journalism to add clarity fairness and equity to news decision making and to offer a moral compass to journalists facing ethical dilemmas in their work It comes at a time when ethical values in the news media are in crisis from a range of technological commercial and social factors and when both Buddhism and mindfulness have gained considerable acceptance in Western societies Further it aims to set out foundational principles to assist journalists dealing with vulnerable sources and recovering from traumatic assignments

Counsels of War Gregg Herken, 2015-02-18 Since the first atomic bomb was exploded in 1945 a close community of civilian experts including scientists academics and think tank intellectuals has advised the American government on the prospects of nuclear war Based on interviews with these experts as well as hundreds of pages of recently declassified documents *Counsels of War* is the first book to trace in detail the deliberations and shifting recommendations of the experts on the bomb from Hiroshima to Star Wars Gregg Herken writes about the people whose profession it has been to think about the unthinkable Robert McNamara Paul Nitze Herman Kahn Bernard Brodie including their intense rivalries personal animosities and often contentious relationship with the professional military He reveals how the influence of the scientist and strategist has extended well beyond the laboratory and the classroom in the proposal of Kennedy's advisers for a nuclear demonstration and even a clever first strike against the Russians for example *Counsels of War* also shatters certain popular assumptions about U S nuclear policy As Herken points out while American doctrine stresses retaliation U S strategists have always planned to pre-empt a Soviet attack Herken shows that the lines in the current nuclear debate were actually drawn at the dawn of the atomic age and that the experts' technically abstruse arguments have only served to hide from the public the fundamental deeply held and quite subjective differences at the heart of the debate Since Hiroshima there has been a growing awareness of the peril created by nuclear weapons yet the crucial questions that were never adequately addressed in 1945 unanswered today Given the inability of the experts to confront the essential dilemma of the nuclear age *Counsels of War* calls for a new nuclear debate one focused on American rather than Soviet intentions and that seeks an answer to the fundamental yet still unresolved question What are these weapons for

Children's Play, Pretense, and Story Susan Douglas, Lesley Stirling, 2015-12-21 At the heart of this volume is the recognition that children's engagement with play and story are intrinsically and intricately linked The contributing authors share a passionate interest in the development and well-being of children in particular through their use of imagination and adaptation of the everyday into

play and stories Following these principles the volume explores the connections between play story and pretense with regard to many cultural and contextual factors that influence the way these elements vary in children s lives In a departure from earlier collections on play and story the authors take a particular focus on normative as compared with atypical development This collection begins with an approach to understanding the developmental relationship between play and story which recognizes their similarities while acknowledging their differences Much of the collection addresses pretend play and story in children with autism spectrum disorder an understudied but important group for consideration as these dimensions of their lives and development have often been considered problematic The volume also includes sections on play and story in classroom settings and play and story across cultures including non English speaking environments such as Israel Romania China and Mexico It concludes with a discussion of how play differs across sociocultural and economic contexts making a unifying claim for the importance of play in children s lives but also calling for an understanding of what play means to very different groups of children

Tick-Host-Pathogen Interactions Sarah Irène Bonnet,Ard Menzo Nijhof,Jose De La Fuente,2018-08-24 Besides causing direct damage associated with blood feeding and in some cases through the excretion of toxins with their saliva the main relevance of ticks lies in the wide variety of pathogens that they can transmit including viruses bacteria protozoa and helminths Owing to socioeconomic and environmental changes tick distribution is changing with incursions of ticks and tick borne diseases occurring in different regions of the world when the widespread deployment of chemical acaricides and repellents has led to the selection of resistance in multiple populations of ticks New approaches that are environmentally sustainable and that provide broad protection against current and future tick borne pathogen TBP are thus urgently needed Such development however requires improved understanding of factors resulting in vector competence and tick host pathogen interactions This Research Topic provides an overview of known molecular tick host pathogen interactions for a number of TBPs and highlights how this knowledge can contribute to novel control and prevention strategies for tick borne diseases

Expanding Adaptation Networks Kate Newell,2017-05-22 This book addresses print based modes of adaptation that have not conventionally been theorized as adaptations such as novelization illustration literary maps pop up books and ekphrasis It discusses a broad range of image and word based adaptations of popular literary works among them The Wizard of Oz Alice in Wonderland Daisy Miller The Strange Case of Dr Jekyll and Mr Hyde Moby Dick and Adventures of Huckleberry Finn The study reveals that commercial and franchise works and ephemera play a key role in establishing a work s iconography Newell argues that the cultural knowledge and memory of a work is constructed through reiterative processes and proposes a network based model of adaptation to explain this Whereas most adaptation studies prioritize film and television this book s focus on print invites new entry points for the study of adaptation
