

I. Write a definition for each of the following words in YOUR own words. Yes look them up but don't copy!

- Control – Variables that are kept the same throughout experiment; part of experiment used to compare to
- Variable – Factors that can or do change during an experiment
- Independent variable – Factor changed by the experimenter to test the hypothesis (I change)
- Dependent variable – Factor that changes because of the independent variable; measureable (data)

II. SpongeBob and his Bikini Bottom pals have been busy doing a little research. Read the following description for each of their experiments and answer the questions provided.

Krusty Krabs Breath Mints

Mr. Krabs created a secret ingredient for a breath mint that he thinks will “cure” the bad breath people get from eating crabby patties at the Krusty Krab. He asked 100 customers with a history of bad breath to try his new breath mint. He had 50 customers (Group A) eat a breath mint after they finished eating a crabby patty. The other 50 customers (Group B) also received a breath mint after they finished the sandwich, however, it was just a regular breath mint and did not have the secret ingredient. Both groups were told that they were getting the breath mint that would cure their bad breath. Two hours after eating the crabby patties, 30 customers in Group A and 10 customers in Group B reported having better breath than they normally had after eating crabby patties.

1. Which group of people were in the control group? Group without the secret ingredient, group B
2. What is the independent variable? The secret ingredient
3. What is the dependent variable? Fresh breath
4. What do you think Mr. Krabs' conclusion should be? The secret ingredient helps people to have fresh breath
5. Give examples/details that support why you think in #4 what Mr. Krabs' conclusion should be. 30 out 50 people from group A had fresh breath but only 10 out 50 people from group B did

Scientific American: Presenting Psychology Deborah Licht, Misty Hull, Coco Ballantyne, 2016-01-11 Presenting Psychology is a fresh concise variation of the breakout bestseller Scientific American Psychology combining the communicative style of the world's most respected science magazine with thoughtful immersive learning to help you reach all kinds of students. Authored by longtime community college instructors Deborah Licht and Misty Hull alongside science journalist Coco Ballantyne, the text centers on profiles and video interviews of 25 real people to help students better understand, remember, and relate to psychology's defining concepts. Chapters also feature full-page Scientific American style infographics which guide students through essential, often complex concepts step by step. **Activity Theory in Formal and Informal**

Science Education Katerina Plakitsi, 2013-09-04 The purpose of this book is to establish a broader context for rethinking science learning and teaching by using cultural historical activity theoretic approach. Activity theory already steps in its third generation and only a few works have been done on its applications to science education, especially in Europe. The context takes into account more recent developments in activity theory applications in US, Canada, Australia, and Europe. The chapters articulate new ways of thinking about learning and teaching science, i.e., new theoretical perspectives and some case studies of teaching important scientific topics in compulsory education. The ultimate purpose of each chapter and the collective book as a whole is to prepare the ground upon which a new pedagogy in science education can be emerged to provide more encompassing theoretical frameworks that allow us to capture the complexity of science learning and teaching as it occurs in and out of schools. The book captures the dialogic and interactive nature of the transferring the activity theory to both formal and informal science education. It also contributes to the development of innovative curricula, school science textbooks, educational programs, and ICT's materials. As a whole, the book moves theorizing and practicing of science education into new face and uncharted terrain. It is recommended to new scholars and researchers as well as teachers/researchers. *Loose-leaf*

Version for Scientific American: Psychology Deborah Licht, Misty Hull, Coco Ballantyne, 2014-01-09 In this breakthrough introduction to psychology, two committed tech-savvy professors, Deborah Licht and Misty Hull, combine years of research and teaching insights with the journalistic skill of science writer Coco Ballantyne, who came to this project directly from Scientific American. Together they have created an introductory textbook and online system that draws on written profiles and video interviews of 27 real people to help students better understand, remember, and relate to psychology's basic ideas. Beautifully designed, the printed text is filled with high-interest examples and features including full-page infographics that help students understand and retain key concepts. Online, additional author-created resources including scaffolded activities and adaptive quizzes provide a seamless learning experience for students and a reliable assessment mechanism for instructors and programs. This innovative collaboration between Worth Publishers and Scientific American reflects a commitment to engaging and educating all students, including those who sometimes seem difficult to engage in the contemporary style of the
