Gardner,Trevor R. Anderson,2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based
strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the
flawed assumptions made at the classroom department and institutional level about what students are learning and what
help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive
list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit
evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies
The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete
analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of
public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision
making around public policy It will be beneficial to life science instructors biology education researchers and science
