Pursuing quality education in Physical and Rehabilitation Medicine Francesca Gimigliano, Maria Gabriella Ceravolo, Jorge Lains, 2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care International bodies like the UEMS Board for Physical and Rehabilitation Medicine PRM or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education The implementation of such rules is to be validated worldwide with special

attention to low and middle income countries This Research Topic aims to stimulate awareness in the scientific community especially for those involved in postgraduate education and policy making decisions It will highlight the need for developing competency based education as a powerful mechanism to align education and training with health system priorities This holds particular value for resource limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population s health profile but also the strengths and weaknesses e g workforce gaps and maldistributions of the health system This goal can be achieved through sharing experiences between those who have engaged themselves in the process of program development curriculum design and competency based education in rehabilitation Over the last 25 years the number of papers addressing the issue of residency education in PRM has exponentially increased testifying the interest towards the role of rehabilitation and more specifically of the PRM doctors as leaders of the rehabilitation team

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee,Kerry J. Kennedy,2017-03-27 There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics Didaktik As important as such debate has been this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design

Neuroinflammation and Behaviour

Luba Sominsky,Adam K. Walker,Deborah M. Hodgson,2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives
