## UNIT ONE

## THE SCIENCE OF GEOGRAPHY

## 1.1 The meaning of Geography

Science is defined as a body of knowledge that is systematized, organized, experimented and verified. And Geography has almost all these characteristics. Hence, it is a science.

Ancient Greeks defined geography for the first time by combining two words "geo" and "graphic"

- Geo means earth and
- Graphic means writing.

Therefore, Geography is description of the earth. But, this definition seems general compared to the current scope of geography.

Note: the first person to define geography was Eratosthenes.

Geography has no single universally accepted definition. The commonly accepted one is" the study of the spatial distribution of both physical and human made things and phenomena on the earth's surface and two way interactions and interdependences between natural and human environments."

All definitions of geography emphasize that geography is a spatial science. In its modern context, spatial perspective is concerned with "where" and "why there" questions.

There are 5 pertinent questions about the phenomena they study. There are: 1. Where are things located?

2. Why are they located where they are?
