Richard Pring,2005-10-01 This book for the first time brings together Professor Pring s thoughts on the philosophy of education and is his first global treatment of the subject His writings reflect a consistency of thought about educational theory and educational aims and the consequence of both for the nature and practice of educational research Professor Pring draws together the different themes providing a distinctively philosophical perspective on educational theory and practice This perspective challenges many of the ideas which underpin government policy impoverish educational practice and weaken educational research in a way unacknowledged even by the research s most ardent critics Nonlinear Predictive

Control Using Wiener Models Maciej Ławryńczuk,2021-09-21 This book presents computationally efficient MPC solutions The classical model predictive control MPC approach to control dynamical systems described by the Wiener model uses an inverse static block to cancel the influence of process nonlinearity Unfortunately the model s structure is limited and it gives poor control quality in the case of an imperfect model and disturbances An alternative is to use the computationally demanding MPC scheme with on line nonlinear optimisation repeated at each sampling instant A linear approximation of the Wiener model or the predicted trajectory is found on line As a result quadratic optimisation tasks are obtained Furthermore parameterisation using Laguerre functions is possible to reduce the number of decision variables Simulation results for ten benchmark processes show that the discussed MPC algorithms lead to excellent control quality For a neutralisation reactor and a fuel cell essential advantages of neural Wiener models are demonstrated **The academy** ,1896 Handbook of

Computational Social Science, Volume 2 Uwe Engel,Anabel Quan-Haase,Sunny Liu,Lars Lyberg,2021-11-10 The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches The Handbook is divided into two volumes

written by outstanding internationally renowned scholars in the field This second volume focuses on foundations and advances in data science statistical modeling and machine learning It covers a range of key issues including the management of big data in terms of record linkage streaming and missing data Machine learning agent based and statistical modeling as well as data quality in relation to digital trace and textual data as well as probability non probability and crowdsourced samples represent further foci The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth into new directions With its broad coverage of perspectives theoretical methodological computational international scope and interdisciplinary approach this important resource is integral reading for advanced undergraduates postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors **Chemical news and Journal of physical science** ,1867
