Chemical Engineering Terminology Muhammad Rashid Usman, Mahmood Saleem, Rabya Aslam, 2015-04-25 This book is a comprehensive collection of chemical engineering terms in a single volume The book is a useful reference material for the people both at the schools and the industry Our experience of teaching and research over the years has made us to realize a must book of this kind Better understanding of the terms helps in better understanding the relevant literature and in communicating with more assurance and less use of words The book is easy to use as the terms are written in an alphabetical order Where a term deserves more elaboration a rather detailed description is provided The book also contains a number of labeled diagrams which are extremely helpful in comprehending some important terms

Design and Analysis of Large Lithium-Ion Battery Systems Shriram Santhanagopalan, Kandler Smith, Jeremy Neubauer, Gi-Heon Kim, Ahmad

Pesaran, Matthew Keyser, 2014-12-01 This new resource provides you with an introduction to battery design and test considerations for large scale automotive aerospace and grid applications It details the logistics of designing a professional large Lithium ion battery pack primarily for the automotive industry but also for non automotive applications Topics such as thermal management for such high energy and high power units are covered extensively including detailed design examples Every aspect of battery design and analysis is presented from a hands on perspective The authors work extensively with engineers in the field and this book is a direct response to frequently received queries With the authors unique expertise in areas such as battery thermal evaluation and design physics based modeling and life and reliability assessment and prediction this book is sure to provide you with essential practical information on understanding designing and building large format Lithium ion battery management systems

Numerical Calculations for Process Engineering Using Excel VBA Chi M. Phan, 2023-12-01 Numerical Calculations for Process Engineering Using Excel VBA provides numerical treatment of process engineering problems with VBA programming and Excel spreadsheets The problems are solving material and energy balances optimising reactors and modelling multiple factor processes The book includes both basic and advanced codes for numerical calculations The basic methods are presented in different variations tailored to particular applications Some macros are combined with each other to solve engineering problems Examples include combining the bisection method and binary search to optimise an implicit correlation combining golden section search with Euler s method to optimise a reactor and combining bisection code and Euler s method to solve steady state heat distribution The text also includes nonconventional examples such as harmony search and network analysis The examples include solutions to common engineering problems such as adiabatic flame temperature plug flow reactor conversion batch reactor heat diffusion and pinch analysis of heat exchanger networks The VBA code is presented with mathematical equations and flowcharts enabling the audience to adopt the solutions to different problems The book contains many demonstrations of numerical techniques to guide users It also includes useful summaries of VBA commands functions and Excel predefined functions accessible in VBA

While the book is developed primarily for undergraduate students the book is a helpful resource for postgraduate students and engineers

Model-Based Tools for Pharmaceutical Manufacturing Processes Krist V. Gernaey, René Schenkendorf, Dimitrios I. Gerogiorgis, Seyed Soheil Mansouri, 2020-03-13 The Special Issue on Model Based Tools for Pharmaceutical Manufacturing Processes will curate novel advances in the development and application of model based tools to address ever present challenges of the traditional pharmaceutical manufacturing practice as well as new trends This book provides a collection of nine papers on original advances in the model based process unit system level quality by design under uncertainty and decision making applications of pharmaceutical manufacturing processes
