Objectives Of The Consumer Protection Act Of April 2009

Karen B. Brown, David V. Snyder

Objectives Of The Consumer Protection Act Of April 2009:

The Goals of Competition Law Daniel Zimmer, 2012 What are the normative foundations of competition law That is the question at the heart of this book Leading scholars consider whether this branch of law serves just one or more than one goal and if it serves to protect unfettered competition as such how this goal relates to other objectives such as the promotion of economic welfare The book brings together contributions on the relevance of different welfare standards on the concept of freedom to compete and on distributional fairness as a goal of competition law Moreover it discusses the relationship to other legal goals such as market efficiency

Cambridge Handbook of Class Actions Brian T. Fitzpatrick, Randall S. Thomas, 2021-02-03 Economic activity is more globally integrated than ever before but so is the scope of corporate misconduct. As more and more people across the world are affected by such malfeasance, the differences in legal redress have become increasingly visible. This transparency has resulted in a growing convergence towards an American model of robust private enforcement of the law including the class action lawsuit. This handbook brings together scholars from nearly two dozen countries to describe and assess the class action procedure or its equivalent in their respective countries and where possible to offer empirical data on these systems. At the same time, the work presents a variety of multidisciplinary perspectives on class actions from economics to philosophy, making this handbook an essential resource to academics, lawyers, and policymakers alike. *Congressional Record* United States. Particularism Marton Varju, 2019-02-08 The book examines how the interests of the member states which provide the primary driving force for developments in European integration are internalised and addressed by the law of the European Union. In this context, member state interests are taken to mean the policy considerations, economic calculations, local socio-cultural factors, and the raw expressions of political will which shape EU policies and determine member state responses to the obligations arising from those policies. The book primarily explores the junctions and disjunctions between member state interests defined in such a manner and EU law where the latter expresses either an obligation for the member states to comply with common policies or an acceptance of member state particularism under the common EU framework.
