

PROJECT BACKGROUND

Program Title:	National Institute of Clinical Studies (NICS) Acute Stroke and TIA Care Bundle
Program Aim:	To improve the assessment and management of acute stroke and TIA in the emergency department
Program Background:	In consultation with the NICS Emergency Care Community of Practice (EC CoP), stroke management in the emergency department (ED) has been identified as a clinical priority area. There are approximately 60,000 new and recurrent strokes in Australia each year. Around half of these people are over the age of 75 and as the population ages the number of strokes per year will increase. Stroke costs the Australian economy an estimated \$2.14 billion per year. Effective early stroke treatment aims to promote maximum recovery and prevent costly complications and subsequent strokes. Given the ED setting and the varied requirements of acute stroke management, the care bundle approach was selected as an appropriate format for an ED evidence-implementation tool. The NICS stroke care bundle is based on evidence-based recommendations from the National Stroke Foundation (NSF) Clinical Guidelines for Acute Stroke.
Program Benefits:	Implementation of the care bundle will result in: ▪ Accurate assessment of stroke care in the ED, via audit process. ▪ Evidence based care consistent with national guideline recommendations. ▪ Timely and accurate assessment of stroke and TIA in the ED. ▪ Timely and appropriate clinical management of stroke and TIA in the ED.

beyond traditional product quality applications *Designing and Conducting Business Surveys* Ger Snijkers, Gustav Haraldsen, Jacqui Jones, Diane Willimack, 2013-08-05 *Designing and Conducting Business Surveys* provides a coherent overview of the business survey process from start to finish. It uniquely integrates an understanding of how businesses operate, a total survey error approach to data quality that focuses specifically on business surveys, and sound project management principles. The book brings together what is currently known about planning, designing, and conducting business surveys with producing and disseminating statistics or other research results from the collected data. This knowledge draws upon a variety of disciplines such as survey methodology, organizational sciences, sociology, psychology, and statistical methods. The contents of the book formulate a comprehensive guide to scholarly material previously dispersed among books, journal articles, and conference papers. This book provides guidelines that will help the reader make educated trade-off decisions that minimize survey errors, costs, and response burden while being attentive to survey data quality. Major topics include: Determining the survey content considering user needs, the business context, and total survey quality; Planning the survey as a project; Sampling frames, procedures, and methods; Questionnaire design and testing for self-administered, paper, web, and mixed mode surveys; Survey communication design to obtain responses and facilitate the business response process; Conducting and managing the survey using paradata and project management tools; Data processing including capture, editing, and imputation, and dissemination of statistical outputs. *Designing and Conducting Business Surveys* is an indispensable resource for anyone involved in designing and/or conducting business or organizational surveys at statistical institutes, central banks, survey organizations, etc., producing statistics or other research results from business surveys at universities, research organizations, etc., or using data produced from business surveys. The book also lays a foundation for new areas of research in business surveys.
