Ocean Power Geography 12:

Testing American Sea Power Craig C. Felker, 2013-03-28 The Pacific Theater in World War II depended on American sea power. This power was refined between 1923 and 1940 when the U S Navy held twenty one major fleet exercises designed to develop strategy and allow officers to enact plans in an operational setting. Prior to 1923 naval officers relied heavily on the theories of Capt Alfred Thayer Mahan who argued that sea control was vital to military victory best attained through use of the battleship. Fleet exercises however allowed valuable practice with other military resources and theories. As a direct result of these exercises the navy incorporated different technologies and updated its own outdated strategies. Although World War II brought unforeseen challenges and the disadvantages of simulation exercises quickly became apparent, fleet problems may have opened the door to different ideas that allowed the U S Navy ultimately to succeed. Testing American Sea Power challenges the conventional wisdom that Mahanian theory held the American Navy in a steel grip. Felker's research and analysis the first to concentrate on the navy's interwar exercises will make a valuable contribution to naval history for historians, military professionals and naval instructors. The Navy in the Post-Cold War World Colin S. Gray, 2010-11 The Navy in the Post Cold War World is the first book to invite the reader to think strategically, explores the strategic relationship among sea, land and air power with particular attention to the course of a conflict viewed as a whole and ventures boldly into the region of the meaning of space strategy for maritime power and the relevance of that power in the still emerging post Cold War security environment. The Navy in the Post Cold War World is unusual because it is written by an internationally recognized general strategic theorist and analyst rather than by a long standing naval writer. Gray is thus better able to view naval issues in proper perspective. Gray delves deeply into the role of sea power as an enabling agent and team player in the overall enterprise of national and international security. He provides the most current assessment of what sea and space power mean for each other as well as envisioning the future of maritime oriented defense. **Guide for Professional Reading for Officers of the United States Navy and Marine Corps** United States. Bureau of Naval Personnel, **A.L.A. Catalog**, 1904 **A.L.A. Catalog** American Library Association, 1904 **Red Star over the Pacific, Second Edition** Toshi Yoshihara, James Holmes, 2018-12-15 Combining a close knowledge of Asia and an ability to tap Chinese language sources with naval combat experience and expertise in sea power theory, the authors assess how the rise of Chinese sea power will affect U S maritime strategy in Asia. They argue that China has laid the groundwork for a sustained challenge to American primacy in maritime Asia and to defend this hypothesis they look back to Alfred Thayer Mahan's sea power theories now popular with the Chinese. The book considers how strategic thought about the sea shapes Beijing's deliberations and compares China's geostrategic predicament to that of the Kaiser's Germany a century ago. It examines the Chinese navy's operational concepts, tactics and capabilities and appraises China's missile force. The authors conclude that China now presents a challenge to America's strategic position of such magnitude that Washington must compete in earnest.

Seapower Geoffrey Till, 1994 This volume explains the evolution of maritime strategy through the twentieth century and concludes with some speculations about its future in the next century The forms and practices of navies and maritime strategy are analysed through the development of eight historical and contemporary topics drawn from the First and Second World Wars the Cold War and post Cold War period

Explaining Contemporary Asian Military Modernization Sheryn Lee, 2021-04-19 This book proposes a novel theoretical framework of interactive arming in order to explain armament dynamics in contemporary Asia Frequently the modernisation of contemporary naval forces in Asia is described as an arms race with the underlying assumption being that weapons acquisitions and increases in defence expenditure are competitive and bilateral and due to conflicting purposes or mutual fears This book argues that the concept of an arms race is an unsuitable one for explaining contemporary military modernisation in 21st century Asia Instead it proposes a novel and innovative concept of interactive arming and argues that what drives conflict is political rivalry not weapons acquisitions Instead of perceiving arming as abnormal behaviour the book views arming as a natural strategic behaviour of states and military modernisation as a basic requirement for a state's ability to survive This book will be of much interest to students of Asian security strategic studies and international relations in general

Great Powers and Geopolitical Change Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

Geopolitics and Empire Gerry Kearns, 2009-06-11 Geopolitics and Empire examines the relations between two phenomena that are central to modern conceptions of international relations Geopolitics is the understanding of the inter relations between empires states individuals private companies NGOs and multilateral agencies as these are expressed and shaped spatially This view of the world achieved notoriety as the scientific basis claimed by Nazi ideologists of global conquest However under this or another name similar sets of ideas were important on both sides of the Cold War and now have a renewed resonance in debates over the New World Order of the so called Global War on Terror Geopolitics is a way of

describing the conflicts between states as constrained by both physical and economic space. It makes such conflicts seem inevitable. The argument of the book is that this view of the world continues to appear salient because it serves to make the projection of force overseas seem an inevitable aspect of the foreign policy of states. This quasi-Darwinian view of international relations makes the pursuit of Empire appear a responsibility of larger and more powerful states. Powerful states must become Empires or submit to others seeking something similar. In its associations with Empire, the study of Geopolitics returns continually to the ideas of a British geographer who never himself used the term. Halford Mackinder is the source of many of the ideas of Geopolitics and by examining his ideas both in their original context and as they have been repeatedly rediscovered and reinvented, this book contributes to current discussions of the ideology and practices of the US Empire today. Miscellaneous Publication, 1930. The Social Studies, 1916. Understanding Contemporary Strategy. Thomas M. Kane, David J. Lonsdale, 2012-03-12. Understanding Contemporary Strategy provides an accessible and comprehensive introduction to the theory and practice of modern strategy. Covering all the main issues in the field, the book explores the major themes through a combination of classical and modern strategic theory, history, and current practice. The book is split into three main sections: Definition and Context, including discussion of the human technological intelligence, ethical, and grand strategic dimensions; Strategy in the Geographic Environments: land, sea, air, and space; Contemporary Strategic Challenges: terrorism, insurgency, and nuclear strategy. Each chapter presents the reader with a succinct summary of the topic but also provides a challenging analysis of current issues, supporting students with pedagogical features such as suggested further reading, boxed case studies, and study questions. This book will be essential reading for upper-level students of strategic studies, war studies, military history, and international security. **China's Relations with Africa**. Joshua Eisenman, David H. Shinn, 2023-08-01. Since Xi Jinping's accession to power in 2012, nearly every aspect of China's relations with Africa has grown dramatically. Beijing has increased the share of resources it devotes to African countries, expanding military cooperation, technological investment, and educational and cultural programs, as well as extending its political influence. This book examines the full scope of contemporary political and security relations between China and Africa. David H. Shinn and Joshua Eisenman not only explain the specific tactics and methods that Beijing uses to build its strategic relations with African political and military elites but also contextualize and interpret them within China's larger geostrategy. They argue that the priorities of Chinese leaders, including the conflation of threats to the Communist Party with threats to the country, a growing emphasis on relations in the Global South, and a focus on countering US hegemony, have combined to elevate Africa's importance among policy makers in Beijing. Ranging from diplomacy and propaganda to arms sales and space cooperation, from increasingly frequent People's Liberation Army Navy port calls in Africa to the rising number of African students studying in China, this book marshals extensive and compelling qualitative and quantitative evidence of the deepening ties between China and Africa. Drawing on two decades of systematic data and hundreds of surveys and in-person

interviews Shinn and Eisenman shed new light on the state of China Africa relations today and consider what the future may hold **A Bibliography of the History of Agriculture in the United States** Everett Eugene Edwards,1930 **The Best Books: F, History and historical biography. G, Archaeology and historical collaterals. 1923** William Swan Sonnenschein,1923 **Sea Power, Politics, and the Onset of the Spanish War, 1936** Willard Chabot Frank,1969
