combine SharePoint 2013 web content management features and capabilities with modern web design and development skills. The key topics to be covered include Design Manager: this new feature allows web designers and developers to build SharePoint branding templates using standard HTML and CSS and convert the templates to SharePoint master pages. This opens up branding to a wider audience of designers who struggled with having to understand the complexity of SharePoint and ASP.NET master pages. Client Object Model: this feature is based on web service technologies for interacting with server-side data from client-side. This feature has been extended significantly to support the new SharePoint application model which heavily emphasizes client-side development. This book will provide full coverage of utilizing these updated web service technologies and how they can be used to build interactive websites. Device Channels: similar to the capabilities provided by HTML5 media queries, the new channels capability allows SharePoint to detect client devices and browsers to load the appropriate master page to provide a unique browser experience. Variations and Translation Services: SharePoint 2013 continues to improve features and capabilities for building multi-lingual sites including new support for integration with professional translation service providers or automated translation web services. Term Set Navigation and SEO Improvements: SharePoint 2013 now provides native support for Search Engine Optimization requirements such as page meta fields as well as a completely new approach to site navigation and human-friendly URLs through the use of Managed Metadata navigation.

Who this book is for: Pro SharePoint 2013 Branding and Responsive Web Development is designed for web designers and developers who have existing knowledge of basic website design and development including HTML, CSS, and JavaScript. This book builds upon that foundational knowledge to walk the reader through a complete project lifecycle for building a responsive website on SharePoint 2013.
