AIM OF THE PROJECT

Using a dataset of recipes and their corresponding ingredients and their nutritional values, we aim to build a predictive model that can estimate the nutritional values of a recipe based on its ingredients. The model will be trained using a supervised learning approach, where the input features are the ingredients and the output is the nutritional values. The model will be evaluated using a cross-validation technique to ensure its performance on new, unseen data.

PREPROCESSING THE DATA

1. The ingredients list is cleaned and standardized.
2. The ingredients list is converted to a numerical format.
