China's Unruly Journalists Jonathan Hassid, 2015-12-22 Despite operating in one of the most tightly controlled media environments in the world Chinese journalists sometimes take extraordinary risks braving the perils of job loss or imprisonment to report sensitive stories As a result a group of journalists stands at the forefront of some of China s most dramatic social and political changes This book is the first to systematically explore why some Chinese journalists decide to challenge Communist Party power holders and the censorship system Based on 18 months of fieldwork interviews with over 70 Chinese journalists and academics and analysis of nearly 20 000 Chinese newspaper articles it investigates the motivation behind news workers who often brave the perils of challenging an authoritarian system Rather than being driven by commercial pressures or financial inducements the book suggests that many aggressive journalists push the limits of acceptable coverage because of their sense of public spirit and their professional role orientation It argues that ultimately these advocate journalists matter

because they challenge specific policies and are changing China one article at a time By investigating these path breaking journalists the book engages with literature across the social sciences on contentious politics and social movements political communication media theory and the sociology of professions Therefore it will be of great interest to students and scholars of Chinese Studies Politics and Media Studies **Living on the Volcano** Michael Calvin, 2015-08-13 SHORTLISTED FOR THE WILLIAM HILL SPORTS BOOK OF THE YEAR AWARD 2015 A man punches the wall in a strategic show of anger Another complains he has become a stranger to those he loves A third relies on my three a day coffee Nurofen and a bottle of wine Yet another admits he is an oddity who would prefer to be working in cricket A fifth describes his professional life as a circus These are football managers live and uncut Arsene Wenger likens the job to living on a volcano any day may be your last He speaks with the authority of being the longest serving manager in the English game having been at Arsenal for 17 years The average lifespan of a Football League manager is 17 months Fifty three managers across all four Divisions were sacked or resigned in the 2012 13 season There were fifty seven managerial changes in the 2013 14 season What makes these men tick They are familiar figures who rarely offer anything more than a glimpse into their personal and professional lives What shapes them How and why do they do their job Award winning writer Michael Calvin provides the answers Insecurity is a unifying factor but managers at different levels face different sets of problems Depending on their status they are dealing with multi millionaires or mortgage slaves Living on the Volcano charts the progress of more than 20 managers in different circumstances and in different phases of their career Some like Brendan Rodgers and Roberto Martinez are at the peak of their profession Others like Chris Hughton Brian McDermott and Gary Waddock have been sacked and are seeking a way back into the game They offer a unique insight into a trade which is prone to superficial judgement and savage swings in fortune Management requires ruthlessness and empathy idealism and cunning Stories overlap experiences intermingle and myths are exposed From African Peer Review Mechanisms to African Queer Review Mechanisms? Artwell Nhemachena, Victor Warikandwa, 2019-04-22 Tracing recent bouts of globalised Mugabephobia to Robert Mugabes refusal to be neoimperially penetrated this book juxtaposes economic liberalisation with the mounting liberalisation of African orifices Reading land repossession and economic structural adjustment programmes together with what they call neoimperial structural adjustment of African orifices the authors argue that there has been liberalisation of African orifices in a context where Africans are ironically prevented from repossessing their material resources Juxtaposing recent bouts of Mugabephobia with discourses on homophobia the book asks why empire prefers liberalising African orifices rather than attending to African demands for restitution restoration and reparations Noting that empire opposes African sovereignty autonomy and centralisation of power while paradoxically promoting transnational corporations centralisation of power over African economies the book challenges contemporary discourses about shared sovereignty distributed governance heterarchy heteronomy and ontology Arguing that colonialists similarly denied Africans of their human essence the tome

problematizes queer sexualities homosexuality ecosexuality cybersexuality and humanoid robotic sexuality all of which complicate supposedly fundamental distinctions between human beings and animals and machines Provocatively questioning queer sexuality and liberalised orifices that serve to divert African attention from the more serious unfinished business of repossessing material resources the book insightfully compares Robert Gabriel Mugabe Thomas Sankara and Julius Kambarage Nyerere who emphasised the imperatives of African autonomy ownership control and sovereignty over natural resources Observing Africans interest in repossessing ownership and control over their resources the book wonders why so much queer international attention is focused on foisting queer sexuality while downplaying more burning issues of resource repossession human dignity equality and equity craved by Africans for whom life is not confined to sexuality With insights for scholars in sociology development studies law politics African studies anthropology transformation decolonisation and decoloniality the book argues that liberal democracy is a faade in a world that is actually ruled through criminocracy

Beppe Grillo's Five Star Movement Dr Filippo Tronconi, 2015-04-28 In 2009 Beppe Grillo a well known Italian comedian established the Five Star Movement with the aim of sending a handful of citizens to municipal councils to act as the watchdog of a professional political class often perceived as corrupt and self interested However in the Italian general elections of February 2013 despite still largely being considered a small protest movement the party gained the undisputed role of leading political actor gaining just under 9 million votes and sending 163 Deputies and Senators to the Italian parliament The birth and rapid rise of the Five Star Movement represents an electoral earthquake with no parallels in Italy and the whole of post 1945 Western Europe and a phenomenon likely to shape the Italian political scene for many years to come Drawing on an extensive array of data and face to face interviews this volume offers an empirically grounded explanation of the surprising electoral success of the Five Star Movement and presents a realistic picture of this party in its manifold aspects organisational structure communication style linkages with civil society ideological nature and positioning in the Italian political system
