press wristwatch automobile or railways though it has qualities of all four In this fast paced study Assa Doron and Robin Jeffrey explore the whole ecosystem of the cheap mobile phone Blending journalistic immediacy with years of field research experience in India they portray the capitalists and bureaucrats who control the cellular infrastructure and wrestle over bandwidth rights the marketers and technicians who bring mobile phones to the masses and the often poor village bound users who adapt these addictive and sometimes troublesome devices to their daily lives Examining the challenges cell phones pose to a hierarchy bound country the authors argue that in India where caste and gender restrictions have defined power for generations the disruptive potential of mobile phones is even greater than elsewhere The Great Indian Phone Book is a rigorously researched multidimensional tale of what can happen when a powerful and readily available technology is placed in the hands of a large still predominantly poor population HT START A HOMEBASED COMPUTER REPAIR Ryan

appropriate technologies both to fight the oppression in their lives and to represent themselves in the world Brazilian favelas are impoverished settlements usually located on hillsides or the outskirts of a city In *Technology of the Oppressed* David Nemer draws on extensive ethnographic fieldwork to provide a rich account of how favela residents engage with technology in community technology centers and in their everyday lives Their stories reveal the structural violence of the information age But they also show how those oppressed by technology don't just reject it but consciously resist and appropriate it and how their experiences with digital technologies enable them to navigate both digital and nondigital sources of oppression and even at times to flourish Nemer uses a decolonial and intersectional framework called Mundane Technology as an analytical tool to understand how digital technologies can simultaneously be sites of oppression and tools in the fight for freedom Building on the work of the Brazilian educator and philosopher Paulo Freire he shows how the favela residents appropriate everyday technologies technological artifacts cell phones Facebook operations repair and spaces Telecenters and Lan Houses and use them to alleviate the oppression in their everyday lives He also addresses the relationship of misinformation to radicalization and the rise of the new far right Contrary to the simplistic techno optimistic belief that technology will save the poor even with access to technology these marginalized people face numerous sources of oppression including technological biases racism classism sexism and censorship Yet the spirit love community resilience and resistance of favela residents make possible their pursuit of freedom
