*Resources in Education* , 2001-10      Perspectives on Mathematics Education H. Christiansen, A.G. Howson, M. Otte, 2012-12-06 BACOMET cannot be evaluated solely on the basis of its publications It is important then that the reader with only this volume on which to judge both the BACOMET activities and its major outcome to date should know some thing of what preceded this book s publication For it is the story of how a group of educators mainly tutors of student teachers of mathematics committed themselves to a continuing period of work and self education The concept of BACOMET developed during a series of meetings held in 1978 79 between the three editors Bent Christiansen Geoffrey Howson and Michael Otte at which we expressed our concern about the contributions from mathematics education as a discipline to teacher education both as we observed it and as we participated in it The short time which was at the teacher educator s disposal allied to the limited knowledge and experience of the students on which one had to build raised puzzling problems concerning priorities and emphases The recognition that these problems were shared by educators from many different countries was matched by the fact that it would be fruitless to attempt to search for an internationally or even nationally acceptable solution to our problems Different contexts and traditions rule this out      **Singapore National Bibliography** , 1981      **Stepping Stones for the 21st Century** , 2007-01-01 Over the years a number of must read articles and book chapters have appeared work
