

## Chapter 2 Properties of Matter

**Section 2.2 Physical Properties****(pages 45–51)**

*This section discusses physical properties and physical changes. It also explains how physical properties can be used to identify materials, select materials, and separate mixtures.*

**Reading Strategy (page 45)**

**Building Vocabulary** As you read, write a definition for each term in the table below. For more information on this Reading Strategy, see the **Reading and Study Skills** in the **Skills and Reference Handbook** at the end of your textbook.

Defining Physical Properties	
Physical Property	Definition
Viscosity	The tendency of a liquid to resist flowing
Malleability	The ability of a solid to be hammered without shattering
Melting Point	The temperature at which a solid changes to a liquid

**Examples of Physical Properties (pages 45–47)**

1. A physical property is any characteristic of a material that can be observed or measured without changing the composition of the substances in the material.
2. Explain why a wooden spoon is a better choice than a metal spoon for stirring a boiling pot of soup. The handle of a wooden spoon will stay cool because wood is not a good conductor of heat.
3. Is the following sentence true or false? A liquid with a high viscosity flows more slowly than a liquid with a low viscosity at the same temperature. true
4. Is the following sentence true or false? Discovering which of two materials can scratch the other is a way to compare the hardness of the materials. true

Match each term to its definition.

Term	Definition
<u>c</u> 5. viscosity	a. The ability of a solid to be hammered without shattering
<u>d</u> 6. conductivity	b. The temperature at which a substance changes from a liquid to a gas
<u>a</u> 7. malleability	c. The resistance of a liquid to flowing
<u>f</u> 8. melting point	d. The ability to allow heat to flow
<u>b</u> 9. boiling point	e. The ratio of the mass of a substance to its volume
<u>e</u> 10. density	f. The temperature at which a substance changes from a solid to a liquid

Kravanja, 2018-12-03 Papers presented at the 2018 International Conference on High Performance and Optimum Design of Structures and Materials are contained in this volume These papers address issues involving advanced types of structures particularly those based on new concepts or new materials and their system design The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture Most high performance structures require the development of a generation of new materials which can more easily resist a range of external stimuli or react in a non conventional manner Particular emphasis is placed on intelligent structures and materials as well as the application of computational methods for their modelling control and management Optimisation problems discussed in this book involve those related to size shape and topology of structures and materials Optimisation techniques have much to offer to those involved in the design of new industrial products The development of new algorithms and the appearance of powerful commercial computer codes with easy to use graphical interfaces has created a fertile field for the incorporation of optimisation in the design process in all engineering disciplines The latest developments in design optimisation manufacturing and experimentation are highlighted in this book      Graphics with Materials Technology John Halliwell, 2004 Helping students prepare for the Edexcel assessment in graphic products this revision text offers advice and
