Boron Separation Processes Nalan Kabay, Marek Bryjak, Nidal Hilal, 2015-01-19 The impending crisis posed by water stress and poor sanitation represents one of the greatest human challenges for the 21st century and membrane technology has emerged as a serious contender to confront the crisis Yet whilst there are countless texts on wastewater treatment and on membrane technologies none address the boron problem and separation processes for boron elimination Boron Separation Processes fills this gap and provides a unique and single source that highlights the growing and competitive importance of these processes For the first time the reader is able to see in one reference work the state of the art research in this rapidly growing field The book focuses on four main areas Effect of boron on humans and plants Separation of boron by ion exchange and adsorption processes Separation of boron by membrane processes Simulation and optimization studies for boron separation Provides in one source a state of the art overview of this compelling area Reviews the environmental impact of boron before introducing emerging boron separation

processes Includes simulation and optimization studies for boron separation processes Describes boron separation processes applicable to specific sources such as seawater geothermal water and wastewater Annual Review of Microbiology

Charles Egolf Clifton,1995 Publishes original critical reviews of the significant literature and current development in microbiology **Geochemical and Biogeochemical Reaction Modeling** Craig M. Bethke,2010-12-09 This book provides

a comprehensive overview of reaction processes in the Earth's crust and on its surface both in the laboratory and in the field A clear exposition of the underlying equations and calculation techniques is balanced by a large number of fully worked examples The book uses The Geochemist's Workbench modeling software developed by the author and already installed at over 1000 universities and research facilities worldwide Since publication of the first edition the field of reaction modeling has continued to grow and find increasingly broad application In particular the description of microbial activity surface chemistry and redox chemistry within reaction models has become broader and more rigorous These areas are covered in detail in this new edition which was originally published in 2007 This text is written for graduate students and academic researchers in the fields of geochemistry environmental engineering contaminant hydrology geomicrobiology and numerical modeling **Industrial Biotechnology** Christoph Wittmann,James C. Liao,2017-04-10 The latest volume in the Advanced

Biotechnology series provides an overview of the main production hosts and platform organisms used today as well as promising future cell factories in a two volume book Alongside describing tools for genetic and metabolic engineering for strain improvement the authors also impart topical information on computational tools safety aspects and industrial scale production Following an introduction to general concepts historical developments and future technologies the text goes on to cover multi purpose bacterial cell factories including those organisms that exploit anaerobic biosynthetic power Further chapters deal with microbes used for the production of high value natural compounds and those obtained from alternative raw material sources concluding with eukaryotic workhorses **New Approaches for Flavin Catalysis**,2019-05-07 New

Approaches for Flavin Catalysis Volume 620 a new volume in the Methods in Enzymology series continues the legacy of this premier serial with quality chapters authored by leaders in the field Topics covered in this update include Anaerobiosis and Methods for Reduction Reduction Potentials Anaerobic Stopped Flow No Glove Box Anaerobic Stopped Flow in a Glove Box Chemical Quenching Oxygen Reactions Double mixing Stopped Flow Kinetic Isotope Effects and Viscosity Effects Heavy Enzymes Synthetic Flavins Linear Free Energy Relationships Vibrational Spectroscopy Stark Spectroscopy EPR and Related Methods Molecular Dynamics Phylogenetic Relationships Superfamilies O₂ and Superoxide Analogs and more Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Methods in Enzymology series Updated release includes the latest information on New Approaches for Flavin Catalysis

Inorganic Polyphosphates Heinz C. Schröder,Werner E.G. Müller,2012-12-06 Inorganic polyphosphates polymers of orthophosphate linked by high energy phosphoanhydride bonds have been found in apparently all forms of life from bacteria

yeasts and fungi to higher plants and animals These polymers which had been neglected for a long time have become a fascinating area of research in the last few years This volume summarizes the present state of knowledge about the metabolism and function of inorganic polyphosphates In addition the methods to study these polymers as well as the biotechnological applications of inorganic polyphosphates are described The 15 chapters of this volume dealing with different aspects of polyphosphate research are written by experts in the field This book represents a valuable source of information not only for researchers working on this subject but also for scientists interested in fundamental aspects of cell and energy metabolism
