

11-4 Inscribed Angles

Find each measure.

1. $m\angle B$

SOLUTION:

If an angle is inscribed in a circle, then the measure of the angle equals one half the measure of its

intercepted arc. Therefore, $m\angle B = \frac{1}{2}(m\widehat{AC}) = 30$.

2. $m\widehat{RT}$

SOLUTION:

If an angle is inscribed in a circle, then the measure of the angle equals one half the measure of its

intercepted arc. Therefore, $m\widehat{RT} = 2(m\angle S) = 126$.

3. $m\widehat{WX}$

SOLUTION:

Here, \widehat{XY} is a semi-circle. So, $m\widehat{XWY} = 180$.

$m\widehat{WX} + m\widehat{WY} = 180$.

If an angle is inscribed in a circle, then the measure of the angle equals one half the measure of its

intercepted arc. So, $m\widehat{WY} = 2(m\angle X) = 114$.

Therefore, $m\widehat{WX} = 180 - m\widehat{WY} = 66$.

4. **SCIENCE** The diagram shows how light bends in a raindrop to make the colors of the rainbow. If

$m\widehat{ST} = 144$, what is $m\angle R$?

SOLUTION:

If an angle is inscribed in a circle, then the measure of the angle equals one half the measure of its

intercepted arc. Therefore, $m\angle R = \frac{1}{2}(m\widehat{ST}) = 72$.

ALGEBRA Find each measure.

5. $m\angle H$

SOLUTION:

If two inscribed angles of a circle intercept the same arc or congruent arcs, then the angles are congruent.

So, $m\angle G = m\angle H$.

$2x - 54 = x$

$x = 54$

Therefore, $m\angle H = 54$.

Navy Department,1952 **Mathematics is Beautiful** Heinz Klaus Strick,2021-06-24 In 17 chapters this book attempts to deal with well known and less well known topics in mathematics This is done in a vivid way and therefore the book contains a wealth of colour illustrations It deals with stars and polygons rectangles and circles straight and curved lines natural numbers square numbers and much more If you look at the illustrations you will discover plenty of exciting and beautiful things in mathematics The book offers a variety of suggestions to think about what is depicted and to experiment in order to make and check your own assumptions For many topics no or only few prerequisites

from school lessons are needed. It is an important concern of the book that young people find their way to mathematics and that readers whose school days are some time ago discover new things. The numerous references to internet sites and further literature help in this respect. Solutions to the suggestions interspersed in the individual sections can be downloaded from the Springer website. The book was thus written for everyone who enjoys mathematics or who would like to understand why the book bears this title. It is also aimed at teachers who want to give their students additional or new motivation to learn. This book is a translation of the original German 2nd edition *Mathematik ist schön* by Heinz Klaus Strick published by Springer Verlag GmbH DE part of Springer Nature in 2019. The translation was done with the help of artificial intelligence machine translation by the service DeepL.com. In the subsequent editing the author with the friendly support of John O'Connor St Andrews University Scotland tried to make it closer to a conventional translation. Still the book may read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Geometry Harold R. Jacobs, 2003-03-14. Harold Jacobs's *Geometry* created a revolution in the approach to teaching this subject, one that gave rise to many ideas now seen in the NCTM Standards. Since its publication nearly one million students have used this legendary text. Suitable for either classroom use or self-paced study, it uses innovative discussions, cartoons, anecdotes, examples, and exercises that unfailingly capture and hold student interest. This edition is the Jacobs for a new generation. It has all the features that have kept the text in class by itself for nearly 3 decades, all in a thoroughly revised, full-color presentation that shows today's students how fun geometry can be. The text remains proof-based, although the presentation is in the less formal paragraph format. The approach focuses on guided discovery to help students develop geometric intuition.
