[Encyclopedia of Biodiversity](#), 2013-02-05. The 7 volume Encyclopedia of Biodiversity Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study. It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it. Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity. The science of biodiversity has become the science of our future. It is an interdisciplinary field spanning areas of both physical and life sciences. Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future. Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes. The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research. Readers can be assured that they are reading material that has been meticulously checked and reviewed by experts. Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms.

Medicinal Mandates Nan Xia, 2025-04-24. This book provides an in depth analysis of Traditional Medical Knowledge (TMK) in China focusing on its preservation responsible use and integration into modern intellectual property (IP) frameworks. It explores the unique challenges of protecting TMK within China's historical cultural and societal contexts while also considering alternative regulatory mechanisms like Access and Benefit Sharing (ABS) regimes and TMK databases. Through case studies such as the commercialization of Qinghao, the book examines the role of TMK in pharmaceutical innovation and critiques the applicability of Western IP systems to Chinese TMK. It also discusses the need for culturally sensitive legal reforms offering practical insights for scholars policymakers and practitioners interested in IP law traditional medicine and

cultural preservation This work is enriched with comparative legal analyses and detailed examples providing a clear understanding of the complexities surrounding TMK in China and its impact on both cultural heritage and innovation

Atlas of Ecosystem Services Matthias Schröter,Aletta Bonn,Stefan Klotz,Ralf Seppelt,Cornelia Baessler,2019-01-31 This book aims to identify present and discuss key driving forces and pressures on ecosystem services Ecosystem services are the contributions that ecosystems provide to human well being The scope of this atlas is on identifying solutions and lessons to be applied across science policy and practice The atlas will address different components

of ecosystem services assess risks and vulnerabilities and outline governance and management opportunities The atlas will therefore attract a wide audience both from policy and practice and from different scientific disciplines The emphasis will be on ecosystems in Europe as the available data on service provision is best developed for this region and recognizes the strengths of the contributing authors Ecosystems of regions outside Europe will be covered where possible The 'Ecosystem Approach' in International Environmental Law Vito De Lucia, 2019-03-28 The ecosystem approach broadly understood as a legal and governance strategy for integrated environmental and biodiversity management has been adopted within a wide variety of international environmental legal regimes and provides a narrative a policy approach and in some cases legally binding obligations for States to implement what has been called a new paradigm of environmental management In this last respect the ecosystem approach is also often considered to offer an opportunity to move beyond the outdated anthropocentric framework underpinning much of international environmental law thus helping re think law in the Anthropocene Against this background this book addresses the question of whether the ecosystem approach represents a paradigm shift in international environmental law and governance or whether it is in conceptual and operative continuity with legal modernity This central question is explored through a combined genealogical and biopolitical framework which reveals how the ecosystem approach is the result of multiple contingencies and contestations and of the interplay of divergent and sometimes irreconcilable ideological projects The ecosystem approach this books shows does not have a univocal identity and must be understood as both signalling the potential for a decisive shift in the philosophical orientation of law and the operationalisation of a biopolitical framework of control that is in continuity with and even intensifies the eco destructive tendencies of legal modernity It is however in revealing this disjunction that the book opens up the possibility of moving beyond the already tired assessment of environmental law through the binary of anthropocentrism and ecocentrism
