

Cut-and-stick Canoe

One common way that people make their own canoes at home is using plywood and the "stitch-and-glue" method. Flat plywood is cut out to a template and then string or cable ties are used to pull it together into shape and lastly glue and fiberglass is used to make it watertight.

We're not asking you to make one of these either, but to get the feel of how it works we have a [downloadable template](#) you can use to have a go. There's a video [here](#) showing the steps too. You'll need paper and optionally card plus scissors and sticky tape.

It's not easy to decorate these once you have taped them together so we recommend decorating them before you stick them together.
