Management of the Difficult and Failed Airway, Third Edition Orlando Hung, Michael F. Murphy, 2017-11-23 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. A full color case based guide to effectively managing airway emergencies updated to reflect the latest devices and techniques. Written by the creators of the Difficult Airway Course Anesthesia™, this beautifully illustrated and extensively referenced text delivers a comprehensive review of the latest options available for airway management and offers expert coverage of the full spectrum of airway management techniques. Within its pages you will find the most up to date review available of the many innovations that have been introduced since publication of the previous edition. This is accompanied by a thorough review of the pharmacology of airway management designed to help you understand how to achieve the desired effects on ventilation and muscle strength. You will also find numerous algorithms, many of which have been revised for this edition. Presented in full color, the book is enhanced by dozens of airway management vignettes divided into Pre Hospital Airway Management, Airway Management in the Intensive Care Unit, Airway Management in the Operating Room, Airway Management in the Pediatric Population, and Airway Management in Unique Environments. These cases teach trainees the fundamental approaches to airway management and include self evaluation questions to reinforce the lesson. For experienced anesthesiologists, the cases present an opportunity to learn about recently introduced devices and techniques they may wish to incorporate into their clinical practice. If you are in need of an expertly written text that describes all of the leading edge principles, tools, and procedures of airway assessment and management, your search ends here.

The United Nations and the Global Ebola Response. The UN emergency health mission "UNMEER" Salome Fischer, Emilie Brandt, 2015-10-28 Master's Thesis from the year 2015 in the subject Politics, Topic International Organisations, grade no grade yet, University of Aarhus, course International Studies, language English, abstract: The unprecedented scope and implications of the 2014 Ebola outbreak in West Africa has confronted the international community with challenges in responding to the crisis. On 19 September 2014, the first ever UN emergency health mission, the United Nations Mission for Ebola Emergency Response (UNMEER), was established. UNMEER was set up as a temporary mission to bring together UN agencies and capabilities in the response and closely collaborate with governments, NGOs, Member States, and other relevant actors with the main strategic objective to stop the Ebola outbreak. This thesis investigates the effects of UNMEER on the global Ebola response as a whole and assesses whether the establishment of the mission was the right decision to make from the UN side in response to the outbreak. In this regard, the context in which UNMEER was established is scrutinized by examining the challenges faced in the outbreak and how these were approached by the international community. The analysis is predominantly based on qualitative primary data collected through individual semi structured interviews with respondents who are or have been

directly involved in the Ebola response as well as on secondary data Findings show that UNMEER had a positive impact on the response in various respects The exceptional decision from the UN side to establish the first ever emergency health mission increased worldwide awareness of the outbreak and catalysed a high level political and financial international engagement in the response Furthermore there seems to be a positive attitude towards UNMEER s role in bringing together UN agencies under a single structure in the response as well as the logistics support provided by UNMEER to UN agencies and other partners working in the response However due to a lack of presence and a limited number of staff in the affected countries effective collaboration with organizations involved on the ground did not sufficiently materialize Findings indicate that overall responders were not satisfied with UNMEER s impact on the ground This seems to be rooted in i a a significant gap between responders expectations and perceptions of UNMEER due to lack of clear information from UNMEER s side on what exactly could be expected of the mission Drawing on research findings and lessons learned from the outbreak instead existing resources and systems under the UN Office for the Coordination of of Humanitarian Affairs OCHA should have been reinforced
