The contributions presented at IABMAS 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance, safety, risk management and life cycle performance. Major topics include new design methods, bridge codes, heavy vehicle and load models, bridge management systems, prediction of future traffic models, service life prediction, residual service life, sustainability and life cycle assessments, maintenance strategies, bridge diagnostics, health monitoring, non-destructive testing, field testing, safety and serviceability assessment and evaluation, damage identification, deterioration modelling, repair and retrofitting strategies, bridge reliability, fatigue and corrosion, extreme loads, advanced experimental simulations and advanced computer simulations among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of more rational decision making on bridge maintenance, safety, risk management and life cycle performance of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including students, researchers and engineers from all areas of bridge engineering.

Wiley FRM Exam Review Study Guide 2016 Part I Volume 1 Wiley, 2016-01-19

RISK MANAGEMENT AND DERIVATIVES Dr. Abhijit Gajghate I Dr. Mukul A. Burghate, The entire scope of financial decision making centres on the trade off between risk and return. Decision making of any kind involves both positive and negative aspects. The objective of an investment decision is to get required rate of return with minimum risk. To achieve this objective various instruments, practices and strategies have been devised and developed in the recent past. With the opening of boundaries for international trade and business the world trade gained momentum in the last decade the world has entered into a new phase of global integration and liberalisation. To overcome the risk arising out of these fluctuating variables and increased dependence of capital markets of one set of countries to the others risk management practices have also been reshaped by inventing such instruments as can mitigate the risk element. These new popular instruments are known as financial derivatives which not only reduce financial risk but also open up new opportunity for high risk takers. It is in this context a Study Material on introduction to the subject RISK MANAGEMENT AND DERIVATIVES is presented to the students of Professional Post Graduate MBA degree. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the author to assist the students by way of providing Study Material as per the curriculum with non-commercial considerations. However it is implicit that these are exam-oriented Study Material and students are advised to attend regular class room classes in the Institute and utilize reference books available.
