Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments **Psychological Assessment in South Africa** provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists psychometrists remedial teachers and human resource practitioners

Cognitive Behavioral Therapy in a Global Context Mark D. Terjesen, Kristene A. Doyle, 2022-10-25 This book presents a new approach to understanding the history and practice of cognitive behavior therapy by presenting country profiles in 38 countries located around the world The objectives of this edited volume are to provide a broad understanding of the practice of CBT internationally as well as country specific practices that will provide researchers and practitioners with important information for consideration in the application of CBT The book begins with an introductory chapter by the editors that discusses the history of CBT and the efforts to globalize and disseminate the science and practice of CBT as well as the unique cultural and international variables The

subsequent chapters offer detailed country profiles of the history and practice of CBT from around the globe. More specifically, chapters will provide an overview of the country's history of psychotherapy, current regulations regarding psychotherapy provision, professional and cognitive behavior therapy organizations, training opportunities, programs in CBT, populations most frequently worked with using CBT in the country, the use and adaptation of CBT, the research on CBT in the country, and CBT with special populations: children, immigrants, HIV, etc. Many of the nations represented are the most populous and influential ones in their respective regions where CBT has been incorporated into psychotherapy training and practice. Taken as a whole, the countries are quite diverse in terms of sociocultural, economic, and political conditions, and the impact of these variables on the practice of CBT in the country will be discussed. The final chapter of the volume offers a summary of the patterns of practice, integrating the main findings and challenges and discussing them within a global context. A discussion of the vision for next steps in the globalization of CBT concludes the book.

Psychology Education and Training Rainer Silbereisen, Pierre Ritchie, Janak Pandey, 2014-01-10. Much of the psychological research in the last century has been conducted in the global North West, hence many prevailing theories and methodologies reflect the philosophical framework and shared cultural knowledge of this region. Other world views and cultural contexts have as yet not had the same opportunity to develop scientific insights that come to the attention of global audiences. Psychology Education and Training is the first truly international effort to generate a framework for common standards in psychological education and training across the globe. Psychologists have long studied human beings in their socio-cultural context. New challenges such as globalisation and the relationship of the brain and behavior require that education and training keep pace with these rapidly evolving developments. The chapters in this book were generated by an international conference which resulted in the Dornburg Accord. While anchored in higher education, the focus is on the generative and translational psychological science needed to fulfill psychology's responsibility to society. Psychology Education and Training is the first book of its kind to cover both historic strengths and the requirements of emerging fields. The book deals with balancing the universalities and cultural specificities of psychological processes, the adjustments to academic curricula required to support national needs, as well as the credentials and regulations required to assure the quality of psychological services. Psychology Education and Training is unique in providing initial data and concurrent assessment of various components of education and training in psychology across the globe. The book is a must for faculty members, advanced students of psychology, and policy makers who are interested in the issues that shape their societies.
