Web Services Business Strategies and Architectures Mike Clark, Peter Fletcher, Jeffrey J. Hanson, Romin Irani, Mark Waterhouse, Jorgen Thelin, 2013-12-14 Adopting Web Services will affect many processes within any organization To throw light on the most important issues we have commissioned Experts in the Industry to share their insights The resultant papers cover a broad spectrum from architecture to business strategies without diverting into deep technological fashions Each study in the collection will answer specific business challenges thrown up by Web Service architectures Before changing commissioning or evaluating a Web Service initiative all IT Managers System Architects Lead Developers and Business Visionaries should study and reference this book

Collaborative Systems for Production Management Harinder Singh Jagdev, Johan C. Wortmann, Henk Jan Pels, 2013-11-11 The business environment throughout the world is currently going through rapid and far reaching change They are analysing their business processes and scrutinising ways to make their systems more streamlined and competitive in order to meet the challenges posed by the Global Economy Forming close alliances and integrating the operational processes with the key suppliers and customers is the mantra every one is embodying In parallel and to support this shift in strategic focus developers are putting forward new concepts in the emerging Information and Communications Technologies ICT to make the integration of processes among collaborating enterprises as seamless and secure as possible Together these developments have yielded a tremendous amount of new knowledge and will continue to offer us new challenges and opportunities well into the future This book brings together the opinions of a number of leading experts analysts academics researchers vendors and industrial practitioners from around the world who have worked extensively in the area of collaborative manufacturing Through individual chapters in this book authors put forward their views approaches and new tools Still other authors present a glimpse of the nature of solutions that may be developed in the near future This book is loosely structured to allow chapters which address common themes to be grouped together In these chapters the reader will learn aU the key issues currently being addressed in production management research and practice throughout the world

Holonic and Multi-Agent Systems for Manufacturing Vladimir Marik, Duncan McFarlane, Paul Valckenaers, 2004-01-24 The increasing complexity of manufacturing systems as well as the overall demands for flexible and fault tolerant control of production processes stimulates among many others two key emerging technologies that are already making an important breakthrough in the field of intelligent manufacturing control and diagnostics These two paradigms are the holonic approach based on the event driven control strategy usually aimed at modular control systems that are directly physically linked with the manufacturing hardware equipment and the multi agent approach developed in the area of distributed information processing The research communities working in both these fields are approaching the problem of intelligent manufacturing from different viewpoints and until recently to a certain extent in an independent way We can however observe quite a clear convergence of these fields in the last few years the communities

have started to cooperate joining efforts to solve the painful problems involved in achieving effective industrial practice We can see convergence in the terminology standards and methods being applied
