RECONSTRUCTING
QUATERNARY ENVIRONMENTS

Lowe & Walker

The Quaternary period is the most recent geological period, extending from the present day back to the beginning of the last glacial period. It is a period of great environmental change, and the study of the Quaternary environment is essential for understanding the present day environment. This book provides a comprehensive overview of the Quaternary environment, covering the last 100,000 years. It discusses the major environmental changes that have occurred, and the impact of these changes on the environment. The book is written in a clear and concise style, and is suitable for students and researchers alike.

Reconstructing Quaternary Environments:

Reconstructing Quaternary Environments J.J. Lowe, M.J.C. Walker, 2014-07-10 Examines the various forms of evidence used to establish the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and isotope ratios bringing the book fully up to date since its last publication.

Reconstructing Quaternary Environments J. John Lowe, Michael J.C Walker, 2014-10-28 This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data and includes new data from terrestrial marine and ice core records. Dating methods are described and evaluated while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth-ocean-atmosphere system and are now central to many areas of contemporary Quaternary research. This comprehensive and dynamic textbook is richly illustrated throughout with full colour figures and photographs. The book will be of interest to undergraduates, postgraduates and professionals in Earth Science, Environmental Science, Physical Geography, Geology, Botany, Zoology, Ecology, Archaeology and Anthropology.

Reconstructing Quaternary Environments J. John Lowe, Mike Walker, Mike J. C. Walker, 2014 Examines the various forms of evidence used to establish the history and scale of environmental changes during the Quaternary. This book examines a wide range of palaeological indicators and synthesises field and laboratory techniques. It is widely illustrated and employs progressive learning techniques throughout.
