conversation will expand their vocabularies and start to make meaningful statements Words go with gestures Young children point with a pudgy index finger and say the name their pointer indicates Pointing and naming remains an endearing characteristic for the rest of a human life Babies follow the path of language evolution Their progress is from the description of the immediate and concrete objects to making abstract statements about events The first thing you do when you are learning a language is point and name You invent nouns Little tykes can get a lot accomplished with their pointing finger and a few nouns Tourists in a foreign country revert to the two year old strategy of pointing naming using pantomime to replace the verbs they do not know One of the most important and least recognized features of the human mind is selftalk In adults selftalk is described as thinking or reflection Aristotle declared that thinking was inner speech and he defined the rules of logic the proper methods of constructing relationships among statements Selftalk is a continuous narrative feature of the mind Through selftalk language becomes a dominant feature of cognition Narrative dominance enables some of the best cognitive abilities that humans display but narrative dominance can also be disabling The recognition that selftalk is thought resolves tedious debates about the relationship of language to cognition It is no longer necessary to argue that the structure and content of languages influence thinking Language is thinking Popular Science ,1983 Electronic Musician ,2001
