Strategic Coupling Henry Wai-chung Yeung, 2016-04-22. In *Strategic Coupling*, Henry Wai-chung Yeung examines economic development and state-firm relations in East Asia, focusing in particular on South Korea, Taiwan, and Singapore. As a result of the massive changes of the last twenty-five years, new explanations must be found for the economic success and industrial transformation in the region. State-assisted startups and incubator firms in East Asia have become major players in the manufacture of products with a global reach. Taiwan's Hon Hai Precision has assembled more than 500 million iPhones for instance, and South Korea's Samsung provides the iPhone's semiconductor chips and retina displays. Drawing on extensive interviews with top executives and senior government officials, Yeung argues that since the late 1980s, many East Asian firms have outgrown their home states and are no longer dependent on state support; as a result, the developmental state has lost much of its capacity to steer and direct industrialization. We cannot read the performance of national firms as a direct outcome of state action. Yeung calls for a thorough renovation of the still dominant view that states are the primary engine of industrial transformation. He stresses action by national firms and traces various global production networks to incorporate both firm-specific activities and the international political economy. He identifies two sets of dynamics in these national-global articulations, known as strategic coupling: coevolution in the confluence of state-firm and global production networks, and the various strategies pursued by East Asian firms to attain competitive positions in the global marketplace.

Business Groups in East Asia Sea-jin Chang, 2006-03-02. The 1997 Asian Crisis principally affected Thailand, Indonesia, Malaysia, and Korea, as well as other East Asian countries heavily dependent on intra-regional trade. Banks and other financial institutions

quickly become insolvent and heavily indebted industrial firms went bankrupt Many of these firms were affiliated with the business groups of this region yet most groups did not immediately collapse indeed they proved remarkably robust some surviving and even prospering This book examines these East Asian business groups and their subsequent restructuring following the Asian Crisis East Asian nations embarked on very different trajectories to this common external shock The Asian Crisis affected the inter relationships among the socio cultural environment the state and the market of each country quite differently and had distinct effects on the operations of these countries business groups This slow yet divergent pattern of development provides evidence against theories of rapid global convergence Yet East Asian business groups face an uncertain future Foreign investors influence has increased substantially since the crisis as East Asian governments had to accommodate their demands to keep attracting foreign capital Governments supervise banks more closely and have loosened restrictions on mergers and hostile takeovers further strengthening the discipline of the market Various entry barriers that had inhibited foreign multinationals from competing in national markets were lifted exposing business groups to intensified foreign competition Under these new conditions business groups in East Asia should reconfigure their business structures and adjust their corporate governance systems to regain momentum for further growth Business groups will continue to be important vehicles for the sustained future growth of this region and this book presents a substantial amount of new data on this which will be of interest to academics researchers and advanced students of East Asian business and business practitioners working within the region

The Politics of the Asian Economic Crisis T. J. Pempel, 2018-09-05 In the summer of 1997 a tidal wave of economic problems swept across Asia Currencies plummeted banks failed GNP stagnated unemployment soared and exports stalled In short the vaunted Asian

Economic Miracle became the Asian Economic Crisis with serious repercussions for nations and markets around the world. While the headlines are still fresh a group of experts on the region presents the first account to focus on the political causes and implications of the crisis. The events of 1997-98 involved not just property values, financial flows, portfolio makeup and debt ratios they argue, but also the power relationships that shaped those economic indicators. As they examine the domestic, regional and international politics that underlay the economic collapse, the authors analyze the reasons why the crisis affected the nations of Asia in radically different ways. The authors also consider whether the crisis indicates a radical change in Asia's economic future.

Routledge Handbook of Southeast Asian Economics Ian Coxhead, 2014-12-17. The Routledge Handbook of Southeast Asian Economics offers new insights into the rapidly developing economies of Southeast Asia. Despite widespread initial deprivation, Southeast Asia has achieved and sustained a remarkable rate of growth in the course of which tens of millions have successfully escaped severe poverty. Though the economies of the region vary in many dimensions, integration into the wider East Asian network of production and trade is a notable common feature, one that continues a centuries-long history of engagement with global trade. A second striking feature is the pace and extent of transformation in the structure of production and in sources of household income in the region, which has undergone remarkably rapid industrialization and urban growth. However, the search for sustained and sustainable growth, through and beyond middle income, continues to confront pressing economic and policy challenges. This Handbook offers a timely and comprehensive overview of Southeast Asian economic development. Organized according to the logic of chronological and thematic unity, it is structured in these sections: Growth and development over the long term; Food, agriculture and natural resources; Trade, investment and industrialization; Population, labor and human capital; Poverty and political economy. Twenty-first century challenges. This original Handbook, written by experts in their fields, is unique in the breadth and depth of its coverage. Its forward-looking perspective renders it relevant both now and in the future. This advanced level reference work will be essential reading for students, researchers and scholars of Asian Studies, Economics and Southeast Asian studies.
