

## SECOND TERM ENGLISH EXAM

### Part One: Reading (15 pts)

#### A) Comprehension: (08 pts)

Read the text carefully then do the activities:

GMFs, or Genetically Modified Foods, are products derived from organisms whose genetic material has been altered in a way that does not occur naturally through mating or natural recombination. This technology allows scientists to introduce desirable traits into crops, such as resistance to pests, diseases, or herbicides, as well as improved nutritional content or shelf life.

Proponents argue that GMFs can help address global food security challenges by increasing crop yields and reducing losses due to pests and diseases. They also highlight potential environmental benefits, such as reduced pesticide use and soil erosion.

However, GMFs remain controversial due to concerns about their safety for human consumption and the environment. Critics worry about potential long-term health effects, the creation of "superweeds" resistant to herbicides, and the loss of biodiversity.

Regulation of GMF's varies by country, with some nations imposing strict labeling requirements or outright bans on certain genetically modified crops. In contrast, other countries have embraced GM technology as a way to enhance agricultural productivity.

As the debate over GMFS continues, it is crucial to weigh the potential benefits against the risks and to ensure that thorough testing and regulatory oversight are in place to safeguard both human health and the environment.
