Second Grade Nonfiction Research Writing:

Nonfiction Craft Lessons JoAnn Portalupi, Ralph J. Fletcher, 2001 Writing nonfiction represents a big step for most students. Most young writers are not intimidated by personal narrative fiction or even poetry but when they try to put together a teaching book report or persuasive essay they often feel anxious and frustrated. JoAnn Portalupi and Ralph Fletcher believe that young nonfiction writers supply plenty of passion, keen interest, and wonder. Teachers can provide concrete strategies to help students scaffold their ideas as they write in this challenging genre. Like the authors' best-selling *Craft Lessons Teaching Writing K-8*, this book is divided into sections for K-2, 3-4, and middle school grades 5-8 students. These divisions reflect various differences between emerging, competent, and fluent writers. In each section, you'll find a generous collection of craft lessons directed at the genre that's most appropriate for that particular age. In the K-2 section, for example, a number of craft lessons focus on the all-about or concept book. In the 3-4 section, there are several lessons on biography. In the 5-8 section, a series of lessons addresses expository writing. Throughout the book, each of the 80 lessons is presented on a single page in an easy-to-read format. Every lesson features three teaching guidelines: Discussion (A brief look at the reasons for teaching the particular element of craft specifically in a nonfiction context), How to Teach It (Concrete language showing exactly how a teacher might bring this craft element to students in writing conferences or a small group setting), and Resource Material (Specific book or text referred to in the craft lesson, including trade books or a piece of student writing in the Appendixes). This book will help students breathe voice into lifeless dump-truck writing and improve their nonfiction writing by making it clearer, more authoritative, and more organized. *Nonfiction Craft Lessons* gives teachers a wealth of practical strategies to help students grow into strong writers as they explore and explain the world around them. Be sure to look at the *When Students Write* videotapes too.

Disrupting Boundaries in Education and Research Suzanne Smythe, Cher Hill, Margaret MacDonald, Diane Dagenais, Nathalie Sinclair, Kelleen Toohey, 2017-08-17 In *Disrupting Boundaries in Education and Research* six educational researchers explore together the potentialities of transdisciplinary research that de-centres human behaviour and gives materiality its due in the making of educational worlds. The book presents accounts of what happens when researchers think and act with new materiality and post-human theories to disrupt boundaries such as self and other, human and non-human, representation and objectivity. Each of the core chapters works with different new materiality concepts to disrupt these boundaries and to consider the emotive, sensory, nuanced material and technological aspects of learning in diverse settings such as in mathematics and learning to swim, discovering the bio-products of eco-sustainable building, making videos and contending with digital government and its alienating effects. When humans are no longer at the centre of the unfolding world, it is both disorienting and exhilarating. This book is an invitation to continue along these paths.
