Invent Your Own Computer Games with Python, 4th Edition Al Sweigart, 2016-12-16 Invent Your Own Computer Games with Python will teach you how to make computer games using the popular Python programming language even if you've never programmed before. Begin by building classic games like Hangman, Guess the Number, and Tic Tac Toe, and then work your way up to more advanced games like a text-based treasure hunting game and an animated collision dodging game with sound effects. Along the way, you'll learn key programming and math concepts that will help you take your game programming to the next level. Learn how to combine loops, variables, and flow control statements into real working programs. Choose the right data structures for the job, such as lists, dictionaries, and tuples. Add graphics and animation to your games with the pygame module. Handle keyboard and mouse input. Program simple artificial intelligence so you can play against the computer. Use cryptography to convert text messages into secret code. Debug your programs and find common errors. As you work through each game, you'll build a solid foundation in Python and an understanding of computer science fundamentals. What new game will you create with the power of Python? The projects in this book are compatible with Python 3. **Law of the Internet, 4th Edition** Delta & Matsuura, 2017-01-01 Law of the Internet Fourth Edition is a two-volume up-to-date legal resource covering electronic commerce and online contracts, privacy and network security, intellectual property and online content management, secure electronic transactions, cryptography and digital signatures, protecting intellectual property online through link licenses, frame control and other methods, online financial services and securities transactions, antitrust and other liability. The Law of the Internet Fourth Edition quickly and easily gives you everything you need to provide expert counsel on Privacy laws and the Internet. Ensuring secure electronic transactions, cryptography and digital signatures. Protecting intellectual property online, patents, trademarks and copyright. Electronic commerce and contracting.
