## Section 2 Factors That Affect Climate Answers:

Analyzing Climate Change Philip Steele, 2018-07-15 Scientific evidence clearly shows that temperatures and the level of CO<sub>2</sub> in the atmosphere have risen dramatically since the end of the nineteenth century coinciding with the rise of industrialization. But what can be done to slow the effects of climate change on humans, plants, and animals and natural resources? This book explains the consequences of further climate change from flooding of coastal areas to unhealthy pollution in urban areas and how governments, businesses, and citizens can proactively work on limiting their use of greenhouse gases. International accords such as the Paris agreement of 2015 and the Kyoto Protocol of 1992 are also discussed.

**Climate Change: Effects: Earth's Climate Gr. 5-8** Erika Gombatz-Gasper, 2019-07-01 This is the chapter slice Earth's Climate from the full lesson plan Climate Change Effects. Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans and how climate has affected where they move and live. Observe a homemade melting ice sheet to understand its effect on sea level. Then create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health such as mosquitoes, heat stroke, and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz, and answer key are also included. *Frequently Asked Questions about the Science of Climate Change* Henry Hengeveld, Elizabeth Bush, Canada. Environment Canada, Canada. Atmospheric Science Assessment and Integration Section, 2008. This document was first published in 2002 to provide reliable, credible responses to the most frequently heard questions and arguments about climate change science. Responses are based on fundamental, well-accepted principles of physics on the highly acclaimed international science assessment reports of the Intergovernmental Panel on Climate Change (IPCC) and on recent peer-reviewed scientific papers. In the initial publication, responses were consistent with the Third Assessment Report of the IPCC published in 2001. This update also includes results from the many new papers and reports published since then, particularly the recently released Fourth Assessment Report of the IPCC published in 2007. Specific references are provided for diagrams and for responses where specific values are introduced. *Why Environmental Solutions Especially Impact Minority People* Earnest N. Bracey, 2015.
