As a student of English literature with a background in mathematics, I have found that the two fields share a common goal: to understand the world through the power of language and logic. My journey in English literature has been a quest for meaning, a search for the universal truths that lie beneath the surface of our human experience. I have been captivated by the intricate plots of Shakespeare's tragedies, the profound insights of Victorian novels, and the revolutionary ideas of the Romantic poets. Each text I read has opened a new window into the human mind, revealing the complexities of our emotions, our desires, and our fears. My background in mathematics has provided me with a unique perspective on these literary works, allowing me to analyze their structure and symbolism with a precision and clarity that is often lacking in traditional literary criticism. I have found that the same logical principles that govern the natural world also govern the human mind, and that the same mathematical concepts that describe the universe also describe the human condition. This interdisciplinary approach has not only deepened my understanding of English literature but has also enriched my appreciation for the beauty and complexity of the human world. I am excited to continue exploring the intersections of these two fields, and I am confident that my studies will lead me to a deeper understanding of the human experience and the power of language to shape our world.

Composition & Photography Harold Davis,2022-01-31 Own composition use composition and make composition your own in your photographs Of all the magical elixirs that make up a successful photograph composition is perhaps the most fundamental and at the same time the most elusive What makes a composition good It s hard to define exactly but we instinctively recognize good composition when we see it There is an undeniable emotional response when a composition resonates with and complements the subject matter of an image But traditional attempts to define good composition and to pass on rules for good compositional construction are often doomed to failure The truth is there are no hard and fast rules Rules eliminate experimentation and spontaneity which are crucial for creating compelling dynamic and exciting compositions The best compositions contain an element of the unexpected Expect the unexpected is perhaps the only viable rule of composition To create exciting compositions you must have a willingness to embrace serendipity and change as part of your artistic practice After all composition is a process not a result In Composition Photography photographer and
