**Russian Modernization** Markku Kivinen, Brendan G. Humphreys, 2020-11-29 Building on an original interpretation of social theory and an interdisciplinary approach this book creates a new paradigm in the Russian studies Taking a fresh view of Russia s multiple experiences of modernization it seeks to explain the Putin era in a completely new way This book explores the paradoxical and contradictory aspects of Russia analyzing the energy dependent economy and hybrid political regime but also religion welfare and culture and their often complex interrelations Written by a community of both Western and Russian scholars this book re affirms the value of social science when confronting a society that has undergone enormous and costly systematic changes The Russian elites see modernization narrowly as economic and technological competitiveness The contributors to this volume see contemporary Russia facing a series of antinomies which are macro level dilemmas that cannot be abolished either by philosophical mediation or by immediate political decisions As such they are the tension fields that constitute choices for various competing agencies This book will be of interest to scholars and students of Russian studies transition studies sociology social policy political science energy policy cultural studies and stratification studies Professionals involved in energy ecology and security policy will also find this publication a rich source

**The Long Game on the Silk Road** S. Frederick Starr, Svante E. Cornell, 2018-04-03 This book argues that American and European policies toward Central Asia and the Caucasus suffer from both conceptual and structural impediments It traces the framework of Western policies to the 1975 Helsinki Final Act which resulted in the stovepiping of relations into political economic and democracy categories and in often uncoordinated or contradictory policies While the authors embrace the goal of promoting

human rights and democracy they argue that the antagonistic methods adopted to advance this goal have proven counter productive They propose that Western governments work with the regional states rather than on or against them and that instead of focusing directly on political systems policies should focus on developing the quality of governance and help build institutions that will be building blocks of rule of law and democracy in the long term The authors also argue that Western leaders have largely failed to grasp the significance of this region relegated it to a subordinate status and thus damaging western interests The development of sovereign economically strong and effectively self governing states in the Caucasus and Central Asia is an important goal in its own right the book stresses the importance of a region where the development and preservation of secular statehood could become a model for the entire Muslim world
