Me Up Faster Than a Speeding Snail
Funnel of Fun An Orthodox Understanding of the Bible with Physical Science
Geoffrey Ernest Stedman, 2010-06 For centuries the Christian world and the scientific world have supposedly been at odds. Those who strictly believe that God created the universe have had difficulty accepting such scientific concepts as the speed of light, the immense distances of astronomy and the long ages of radioactivity and earth science. This book bridges the gap between scientific and Christian beliefs by asking the reader: What if both sides are parallel revelations by God? An Orthodox Understanding of the Bible With Physical Science is a mixture of Biblical exposition and explanation of modern physical science including relativity and quantum theory. The book also includes a chapter of scientific parables for children. Author Geoffrey Ernest Stedman is a retired emeritus professor of physics at the University of Canterbury in Christchurch, New Zealand. He believes he owes his life to modern science. Stedman is also an evangelical Christian who takes the text of the Bible as definitive for faith. He wrote this book out of concern for the way creationism has debunked Christianity in the eyes of many. He hopes this text will remove unnecessary obstacles for the acceptance of the Christian faith and the results of scientific study.
