Learner Performance in South Africa
Charles Edward Wickens Simkins, Andrew Paterson, 2005 South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts But the quality of the output from the school system has been questioned In seeking to identify the reasons for this it is important to relate educational outputs competencies as measured for instance by examinations or standardized tests to inputs Determining the relative contributions of the inputs of the school the household and the individual learner to educational outputs is not straightforward particularly since very little educational production function analysis has been undertaken in South Africa Until recently no South African school data has incorporated test results school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis However the results from a survey of a sample of schools involved in the large scale Quality Learning Project QLP funded by the Business Trust have yielded such data The QLP data set offers a new analytical opportunity to address the question What are the effects of social and economic variables on educational outcomes in the QLP schools

Equality in Education: Fairness and Inclusion Hongzhi Zhang, Philip Wing Keung Chan, Christopher Boyle, 2014-10-24 Equality in Education Fairness and Inclusion is a scholarly call to action As the book reminds us governments come and go and in doing so they busy themselves with policy to mark their patch Inequality and exclusion remain stubborn foes that are proving to be somewhat impervious to glossy policy pronouncements The change that Hugo Claus calls for requires careful analysis and bold actions The editors have assembled

a collection of insightful essays that assist in that project Professor Roger Slee Victoria University Melbourne Australia This book attempts to consider the notion of fairness and inclusion in the context of education from different national perspectives which is a laudable undertaking The Editors have managed to put together a diverse informative and interesting account of equality and fairness that transcends international borders The Editors are to be commended on their remarkable achievement in bringing together so many authors to discuss such an important subject yet producing a cohesive collection of chapters that elucidate the diverse nature of equity in education Professor Divya Jindal Snape University of Dundee UK

Multilingual Education Yearbook 2021 Anthony A. Essien,Audrey Msimanga,2021-05-04 This edited book attempts to foreground how challenges and complexities between policy and practice intertwine in the teaching and learning of the STEM subjects in multilingual settings and how they policy and practice impact on educational processes developments and outcomes The unique feature of this book thus lies in its combination of not just language issues in the teaching and learning of the STEM subjects but also in how these issues relate to policy and practice in multilingual contexts and how STEM research and practice may inform and shape language policies and their implementation in multilingual contexts This book is of interest to stakeholders involved in STEM education such as researchers undergraduate and graduate students tertiary level teachers teacher educators curriculum developers as well as other professionals with responsibilities in STEM education subjects The book is written in a way that is accessible to a wide range of backgrounds including those who are in language education

The Idea and Practice of Reading R. Joseph Ponniah,Sathyaraj Venkatesan,2018-05-08 This book addresses basic issues in language education and explores how reading with a focus on meaning contributes to the development of all aspects of language including vocabulary spelling grammar and syntax It departs from traditional methods and practices in language learning to investigate the potency of reading in improving language acquisition The traditional practice in language classes to teach language skills explicitly through acquiring forms and structures of language is often less than successful and teachers are gradually incorporating reading materials and practices into the curriculum This book provides important inputs to language teachers and educators on the need to include reading as an idea and as a practice into the curriculum Among other things it explores the benefits of incidental learning of language properties such as vocabulary syntax and grammar and gives adequate exposure to different types of reading strategies to promote reading among learners It also exploits the possible transfer of L1 reading strategies and capabilities to L2 reading for language acquisition In so doing this book hopes to promote autonomous learning among L2 learners and guide readers in alternative strategies to solve comprehension problems

Rules and Processes John L. Comaroff,Simon A. Roberts,Simon Roberts,1981 *Rules and Processes* is at once a compelling essay in social theory and a pathbreaking ethnography of dispute in an African society On the basis of a sensitive study of the Tswana of southern Africa John Comaroff and Simon Roberts challenge most of the orthodoxies of legal anthropology They argue that the social world and the dispute processes that occur within it are

given form and meaning by a dialectical relationship between sociocultural structures and individual experience The authors explore in a novel way the relations between culture and ideology system and practice social action and human intention They develop a model that lays bare the form and content of legal and political discourse in all its variations a model that accounts for the outcome of conflict processes and explains why the Tswana like people in other cultures conceive of their world in an apparently contradictory manner as rule governed yet inherently open to pragmatic individualism orderly yet inherently fluid and shifting Rules and Processes offers a fresh and persuasive approach to our understanding of the dialectics of social life A work of impressive scholarship in which theoretical sophistication and ethnographic richness are convincingly matched Ian Hamnett Times Higher Education Supplement *Introduction to Tswana* Alexander

Sandilands,1953 A contribution to racial understanding dedicated to the memory of a great man Robert Moffat of Kuruman

Tone Orthography and Literacy David Roberts,Stephen L. Walter,2021-07-15 This book presents the results of a series of literacy experiments in ten Niger Congo languages representing four language families and spanning five countries It asks the research question To what extent does full tone marking contribute to oral reading fluency comprehension and writing accuracy and does that contribution vary from language to language One of the main findings is that the ethno literacy profile of the language community and the social profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic profiles of the language Our data also suggest that full tone marking may be more beneficial for less educated readers and those with less experience of L1 literacy The book will bring practical help to linguists and literacy specialists in Africa and beyond who are helping to develop orthographies for tone languages It will also be of interest to cognitive psychologists exploring the reading process and researchers investigating writing systems
