and comprehensive guide identifying all of the world's sharks. Sharks are some of the most misunderstood animals on the planet. We still have a lot to learn about these fascinating creatures which are more seriously threatened with extinction and in greater need of conservation and management than any other major group of vertebrates. A Pocket Guide to Sharks of the World is the only field guide to identify, illustrate and describe every known shark species. Its compact format makes it handy for many situations including recognizing living species, fishery catches or parts sold at markets. This expanded second edition presents lavish images, details on newly discovered species and updated text throughout. The book contains useful sections on identifying shark teeth and the shark fins most commonly encountered in the fin trade and takes a look at shark biology, ecology and conservation. A Pocket Guide to Sharks of the World will be an essential resource and definitive reference for years to come. An updated guide to all of the world's sharks. Each species is illustrated and described. Handy compact format with concise text. Useful sections on the identification of shark teeth and fins.

Sharks of the World Leonard J. V. Compagno, Marc Dando, Sarah L. Fowler, 2005-01. Written by two of the world's leading authorities and superbly illustrated by wildlife artist Marc Dando, this is the first comprehensive field guide to all 440 plus shark species. Color plates illustrate all species and detailed accounts include diagnostic line drawings and a distribution map for each species.

A Field Guide to the Sharks of the World Leonard J. V. Compagno, Marc Dando, Sarah L. Fowler, 2005. The definitive identification guide to the sharks of the world. The shark is undeniably the lord of the seas, having existed unchanged for 350 million years. Not only is it the biggest of fish, it is also the best equipped for hunting down and destroying its prey. It is capable of living in all waters, shallow or deep, tropical or temperate, fresh or salt, and unlike most animals, it has no natural predators apart from the Killer Whale. Set to become a classic natural history title, Collins Field Guide to Sharks describes and illustrates the world's 530 species of shark. Shark families are grouped together and for each individual species, there is detailed identification information and original colour illustration and a distribution map showing where in the world that species can be found. Covering all aspects of these

extraordinary creatures from their behaviour breeding feeding and ecology right through to the impact of humans on sharks throughout the world this is one of the most important shark books ever written
