This guide shows beginning and intermediate photographers how to capture still images and videos with the Coolpix P600 and why to use the camera's many shooting options to get the results they want. The book explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR, High Dynamic Range photography, ISO, memory cards, and flash modes. The book includes a discussion of techniques for using the camera's phenomenal zoom lens with a maximum focal length of 1440mm to full advantage. The book also discusses the camera's features for image transfer and remote control through the P600's built-in wireless Wi-Fi network. The book includes images taken using the creative settings of the camera, including the Picture Control settings which alter the color processing of images, the Scene and Special Effects shooting modes with settings optimized for subjects such as landscapes, portraits, pets, sunsets, and action shots, and the camera's features for continuous burst shooting and time lapse photography. In addition, the book provides introductions to topics such as infrared photography, street photography, and macro photography. The book also explains the video recording abilities of the Coolpix P600, which can shoot high definition HD video with stereo sound and can record clips of high speed video at rates up to 4 times normal speed. In addition, the book describes procedures for playing back images and videos in the camera and for using the Filter Effects option to add special effects to images after they have been captured. In three appendices, the book discusses accessories for the Coolpix P600, including cases, external flash units, charging options, and a filter adapter. Recording, Documentation and Information Management for the Conservation of Heritage Places Robin Letellier, Rand Eppich, 2015-12-22 This two volume

guide provides a comprehensive overview of the fundamental principles and guidelines for documenting cultural heritage places. It seeks to aid heritage managers and decision makers in understanding their roles and responsibilities in this essential activity. Volume 1 Guiding Principles explains why heritage managers must make sure that heritage information is fully integrated into all research, investigation, and conservation activities. Through the discussion of basic principles, benefits, and new approaches, it assists those in charge of preserving immovable cultural heritage by bringing current heritage information practices to a new level. By recording, we create a reference for evaluating change and add to the understanding of a site. By documenting, we guarantee that information is systematically collected and preserved for future use. By managing the information, we make it available and provide a basis for sharing our knowledge and understanding. Volume 2 presents illustrated examples from around the world. Good documentation of a site allows for better understanding of the site's value. Recognizing value and significance is often the first step toward a site's eventual conservation. The information obtained through the documentation process allows conservation professionals to record current conditions, consider appropriate conservation options, plan interventions, apply treatments, and finally measure the results of their efforts. Documentation can be a tool in resolving a conservation issue. This volume presents several illustration examples from around the world in various stages of conservation.

Popular Photography, 2005-05 **Popular Photography**, 2005-09 **Popular Photography**, 2005-08 **Doing Educational Research**, 2015-01-01

In the second edition of *Doing Educational Research*, we explore a variety of critical issues and methodologies. Authors include some of the most influential voices selected from across the spectrum of career disciplines. The scholars provide detailed insights into dimensions of the research process that engage both students and experienced researchers with key concepts and recent innovations in the art of doing research. The contributors adopt a stance that is practical as it introduces beginning scholars to social inquiry and innovative as it transforms the boundaries of conversations about educational research. *Doing Educational Research* appears at a critical moment in which educational researchers are pushed to align with a pervasive scientism that embraces tenets of crypto-positivism. The book addresses logics of inquiry underpinning cutting-edge approaches to educational research that extend far beyond limited visions that are presented through the lenses of positivism. The chapters explore a variety of methodologies including action research, bricolage, ethnography, hermeneutics, historiography, media-based research, psychoanalysis, and conversation analysis in a matrix of social theory, authentic inquiry, critical pedagogy, and differences in epistemology, ontology, and axiology. A diverse array of complex topics are presented in accessible forms and will compel both scholars and students.
